QUESTION 1

To which two items can a vSAN storage policy be applied? (Choose two.)

A. All objects that make up the virtual machine

B. Only virtual hard disks

C. Individual objects that make up the virtual machine

D. Storage folder

Correct Answer: AB

QUESTION 2

Which replication solution is supported with vSAN and Site Recovery Manager?

A. vSAN iSCSI synchronous replication

B. vSphere Replication

C. vSAN iSCSI asynchronous replication

D. vSphere Fault Tolerance

Correct Answer: B

QUESTION 3

When can a change to a storage policy be made?

A. Only when creating a new policy, because policies become protected objects after creation.

B. A change to SPBM policies can be made at any time.

C. A change to a policy can be made at any time, but only if there are no VMs using that policy.

D. After shutting down any VMs using that policy to ensure data integrity.

Correct Answer: B

StripeWidth=2: VM Storage Policy in Use

The VM storage policy is in use by 2 virtual machine(s). Changing the VM storage policy will make it out of sync with those 2 virtual machine(s).

Reapply the VM storage policy to those 2 virtual machine(s) to make it in sync. This action might take significant time and system resources.

Reapply to VMs: Manually later

Save changes?

Yes   No

QUESTION 4

What happens when a healthy capacity tier disk is pulled from one of the ESXi hosts in a vSAN cluster?

A. The components on the affected device are marked "Failed" and the resync starts after 60 minutes by default, if the original disk is NOT reinserted.

B. The components on the affected device are marked "Absent" and the resync starts immediately by default.

C. The components on the affected device are marked "Absent" and the resync starts after 60 minutes by default, if the original disk is NOT reinserted.

D. The components on the affected device are marked "Failed" and the resync starts immediately by default.

Correct Answer: C

QUESTION 5

Which two statements are true about the vSAN health and performance services? (Choose two.)

A. The vSAN performance service must be enabled before the vSAN health service.

B. The vSAN health service is enabled by default.

C. The vSAN health service is disabled by default.

D. The vSAN performance service is disabled by default.

Correct Answer: BD
