QUESTION 1

What is the definition of Workload in vRealize Operations?

- A. The active demand relative to entitlement
- B. The actual capacity a resource is consuming
- C. The amount of contention a resource is experiencing
- D. The amount of capacity a resource is requesting

Correct Answer: D

Reference <https://pubs.vmware.com/vrealizeoperationsmanager-62/index.jsp?topic=%2Fcom.vmware.vcom.core.doc%2FGUID-525C4C2E-7CC7-422E-B357-997E0B4581AF.html>

QUESTION 2

When installing and configuring vRealize Operations clusters, what are three requirements for creating a node? (Choose three.)

- A. In the analytics cluster, CPU, memory and disk size must be identical for all nodes
- B. In the analytics cluster, nodes may be different kinds of deployment: vApp or Linux
- C. In the analytics cluster, CPU, memory and disk size must NOT be identical for all nodes
- D. All nodes must run the same vRealize Operations Manager version
- E. Remote collector nodes may be of different sizes from each other or from the uniform analytics cluster node size

Correct Answer: ABD

QUESTION 3

Where can Alert definitions be enabled or disabled in vRealize Operations Manager?

- A. Administration -> Policies
- B. Administration -> Access Control
- C. Content -> Policies
- D. Content -> Notifications

Correct Answer: A

Reference: <https://pubs.vmware.com/vrealizeoperationsmanager-62/index.jsp?topic=%2Fcom.vmware.vcom.core.doc%2FGUID-D0FE7A3E-083F-4B74-AC57-020EFE94B98D.html>

QUESTION 4

View the Exhibit

What does the referenced Capacity Remaining widget, when included in a dashboard, display? (Choose the best answer.)

- A. The selected object's general capacity remaining score and a bar chart of the object's resource with the least remaining capacity
- B. The selected object resources' capacity remaining scores represented as bar segments for remaining CPU, memory and disk space
- C. The selected object's worst resource capacity remaining score and bar segments that list all of the object's resources enabled by policy for capacity remaining calculation
- D. The selected object's capacity remaining score and a bar chart showing numbers of subscribers, such as virtual machines on a cluster

Correct Answer: B

QUESTION 5

Which dashboard allows a user to identify the clusters that have virtual machines suffering from memory contention and CPU contention?

- A. Cluster Contention dashboard
- B. Cluster Performance dashboard

C. Cluster Configuration dashboard

D. Operations Overview dashboard

Correct Answer: B
