QUESTION 1

In which two places can a calling-party transformation CSS be selected that makes it available for use by a phone? (Choose two.)

- A. on a softkey
- B. on a route pattern
- C. on a line
- D. device pool of the phone
- E. on the device itself

Correct Answer: BD

QUESTION 2

A user's phone Call Forward No Answer setting has been configured to forward to a hunt pilot. If all call hunting options have been exhausted and the Forward Hunt No Answer feature has been configured to use Personal Preference settings, to which of these will calls to this phone be forwarded?

- A. the default destination configured under Service Parameters
- B. any destination configured under the user's DN Personal Settings configuration
- C. the destination specified under the user's Call Forward No Coverage settings
- D. voice mail
- E. no other destination; each call will continue to ring until the caller hangs up

Correct Answer: C

You can implement the personal preferences option. To do so, configure a user phone so that the Forward No Answer field redirects the call to a hunt pilot, which searches for someone else to answer the call. If call hunting fails because all the hunting options are exhausted or because a timeout period expires, the call can be sent to a personalized destination for the person who was originally called. For example, if you set the Forward No Coverage field in the Directory Number Configuration page to a voice-mail number, the call will be sent to the voice mailbox of that person if hunting fails.

QUESTION 3

What function does the device pool perform?

- A. It separates user and physical location information.
- B. It sets the default device parameters for all IP phones in the cluster.
- C. It sets the location bandwidth used between different locations.

D. It provides a single point of configuration for every device in a Cisco Unified Communications Manager cluster.

Correct Answer: A

QUESTION 4

Refer to the exhibit.

The top screenshot shows the 'Region Configuration' page for 'REGION1'. The 'Region Relationships' table is as follows:

Region	Audio Codec Preference List	Maximum Audio Bit Rate	Maximum Session Bit Rate for Video Calls	Maximum Session Bit Rate for Immersive Video Calls
REGION1	CCNP COLLAB	60 kbps	384 kbps	2147483647 kbps
REGION2	CCNP COLLAB	64 kbps (G.722, G.711)	Use System Default (384 kbps)	Use System Default (2000000000 kbps)
NOTE: Regions not displayed	Use System Default	Use System Default	Use System Default	Use System Default

The bottom screenshot shows the 'Audio Codec Preference List Configuration' page for 'CCNP COLLAB'. The 'Audio Codec Preference List Information' section shows:

- Name*: CCNP COLLAB
- Description*: CCNP COLLAB
- Codecs in List*:
 - G.722 48k
 - G.711 U-Law 64 k
 - G.729 8k
 - G.711 A-Law 56k

An engineer is troubleshooting this video conference issue:

A video call between a Cisco 9971 in Region1 and another Cisco 9971 in Region1 works.

As soon as the Cisco 9971 in Region1 conferences in a Cisco 8945 in Region2, the Region1 endpoint cannot see the Region2 endpoint video.

Which cause of this issue is true?

- A. Maximum Session Bit Rate for Video Calls is too low.
- B. Maximum Audio Bit Rate should be increased.
- C. Cisco 8945 does not have a camera connected.
- D. Maximum Session Bit Rate for Immersive Video Calls is too low.

Correct Answer: B

QUESTION 5

Which two of these describe Meet-Me conferencing? (Choose two.)

- A. The conference originator of the conference acts as the controller of the conference and is the only participant who can add or remove other participants.
- B. Any participant can add and remove other conference participants.
- C. Anyone who has calling privileges to call the directory number while the conference is active can join the conference.
- D. Multiple ad hoc conference can be added.
- E. A range of directory numbers must be allocated for exclusive use by the conference.

Correct Answer: CE
