-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

On an ASA running version 9.0, which command is used to nest objects in a pre-existing group?

- A. object-group
- B. network group-object
- C. object-group network
- D. group-object

Correct Answer: D

---

### QUESTION 2

How much storage is allotted to maintain system, configuration, and image files on the Cisco ASA 1000V during OVF template file deployment?

- A. 1GB
- B. 5GB
- C. 2GB
- D. 10GB

Correct Answer: C

---

### QUESTION 3

Which configuration on a switch would be unsuccessful in preventing a DHCP starvation attack?

- A. DHCP snooping
- B. Port security
- C. Source Guard
- D. Rate Limiting

Correct Answer: D

Other Catalyst switch features, such as IP source guard, can provide additional defense against attacks such as DHCP starvation and IP spoofing. Similar to DHCP snooping, IP source guard is enabled on untrusted Layer 2 ports. All IP traffic is initially blocked, except for DHCP packets captured by the DHCP snooping process. Once a client receives a valid IP address from the DHCP server, a PACL is applied to the port. This restricts the client IP traffic to those source IP addresses configured in the binding. Any other IP traffic with a source address other than the addresses in the binding is filtered. <http://www.cisco.com/c/en/us/support/docs/switches/catalyst-3750-series-switches/72846-layer2-secftrscatl3fixed.html#ipsourceguard>

---

**QUESTION 4**

ASA in transparent mode, for which traffic default route is required?

- A. trusted
- B. untrusted
- C. Internet,
- D. inside
- E. management

Correct Answer: E

In transparent mode, the default route, which is required to provide a return path for management traffic, is only applied to management traffic from one bridge group network. This is because the default route specifies an interface in the bridge group as well as the router IP address on the bridge group network, and you can only define one default route. If you have management traffic from more than one bridge group network, you need to specify a regular static route that identifies the network from which you expect management traffic.

---

**QUESTION 5**

Which action is considered a best practice for the Cisco ASA firewall?

- A. Use threat detection to determine attacks
- B. Disable the enable password
- C. Disable console logging
- D. Enable ICMP permit to monitor the Cisco ASA interfaces
- E. Enable logging debug-trace to send debugs to the syslog server

Correct Answer: C
