## QUESTION 1

**Scenario**

In this simulation, you have access to the mail flow policies and sender groups configured on a Cisco Email Security Appliance. You are also provided the following list of fictional domains. SenderBase has records for one sender from each of these domains. The list provides the domain name and the SenderBase Reputation Score for the domain's sender.

red.public, -6  
orange.public, -4  
yellow.public, -2  
green.public, 2  
blue.public, 6

Your task is to review the configuration on the Cisco Email Security Appliance, and then answer **four** multiple choice questions about the behavior of the Cisco Email Security Appliance given the configuration and the domain SenderBase Reputation Scores.

**Instructions**

Access the configuration of the Cisco Email Security Appliance using the MailFlowPolicies tab. Within the GUI, you can navigate between the Host Access Table Overview and Mail Flow Policies tables.
