QUESTION 4

An engineer is designing a cloud security solution and wants to ensure that line-rate deep traffic inspectors are occurring.

Which feature accomplishes this result?

- A. a pair of Cisco ASA appliances in active/standby mode
- B. overlapping IP addresses
- C. NGIPS integration
- D. strict TCP environment

Correct Answer: C

QUESTION 5

A customer wants to automate some tasks within a private cloud. The customer previously deployed VM-focused infrastructures but now prefer a solution that meets these requirements.

Enables better performance and lower overhead than VMs

Enables environment abstraction at the OS level

Boots in milliseconds

Offers stable, maximum performance independent of workloads

Which technology satisfies these requirements?

- A. KVM
- B. container-based virtualization
- C. FlexPod
- D. higher-performance VMs
- E. Vblock

Correct Answer: B
