QUESTION 2

A list of company executives is routinely being spoofed, which puts the company at risk of malicious email attacks. An administrator must ensure that executive messages are originating from legitimate sending addresses. Which two steps must be taken to accomplish this task? (Choose two.)

- A. Create an incoming content filter with SPF detection.
- B. Create a content dictionary including a list of the names that are being spoofed.
- C. Enable the Forged Email Detection feature under Security Settings.
- D. Enable DMARC feature under Mail Policies.
- E. Create an incoming content filter with the Forged Email Detection condition.

Correct Answer: AD

QUESTION 3

Which suboption must be selected when LDAP is configured for Spam Quarantine End-User Authentication?

- A. Designate as the active query
- B. Update Frequency
- C. Server Priority
- D. Entity ID

Correct Answer: A

QUESTION 5

A Cisco ESA administrator has several mail policies configured. While testing policy match using a specific sender, the email was not matching the expected policy.

What is the reason of this?

- A. The "From" header is checked against all policies in a top-down fashion.
- B. The message header with the highest priority is checked against each policy in a top-down fashion.
- C. The "To" header is checked against all policies in a top-down fashion.
- D. The message header with the highest priority is checked against the Default policy in a top-down fashion.

Correct Answer: D
