## QUESTION 1

All release 0x and later Avaya Aura?Communication Manager (CM) deployments support secure link access:

SAL for remote access to the server and alarm notification from the server to the support engineer? Which hardware or software is required at the customer site for SAL support of the CM server?

- A. SAL software is required and uses a separate SAL server.
- B. SAL software is required and uses a secure external modem.
- C. SAL software is part of System Platform and requires no additional hardware.
- D. SAL software is part of System Platform and uses a remote maintenance board (RMB) that must be installed in the server.

Correct Answer: A

## QUESTION 2

Scenario

A remote user Avaya softphone to work from home reports that the client desktop application will not register. After verifying that the user has configured the softphone application to "point" to the current IP address of a Communication Manager Gatekeeper using an administered extension, you ask if the user supplied a password when logging on. The user confirms that the password was used on each log-on attempt. You look up the user's information and note that the type field is 4620 (IP telephone) and the security code field is.

```
display
Page 1 of 5
Extension: 4000
Type: 4620
Port: 580006
Name: John Doe
STATION OPTIONS
Loss Group: 19
Speakerphone: 2-way
Display Language: english
Survivable GK Mode Name:
Survivable COR: internal
Survivable Trunk Dest? y
Lock Messages? n
Security Code: *
Coverage Path 1:
Coverage Path 2:
Hunt-to Station:
BCC: 0
TN: 1
COR: 1
COS: 1
Time of Day Lock Table:
Personalized Ringing Pattern: 1
Message Lamp Ext: 4000
Mute Button Enabled? y
Expansion Module? n
Media Complex Ext:
IP SoftPhone? n
IP Uiden? n
Short/Prefixed Registration Allowed: default
Customizable Labels? y
```

With reference to the scenario described in the exhibit, which action should you take to ensure that the user can use the IP SoftPhone?

- A. Change the IP SoftPhone field to y.

- B. Change the Converge Path 1 value to match the value in converge path 2.
- C. Change the message Lamp Ext value to match the extension number.
- D. Change the name in the name field to match the name as administered in the LDAP directory.

Correct Answer: A

---

### QUESTION 3

Which trunk type is supported by media module MM710, and circuit packs TN767E, TN464HP, TN2464CP, and TN2207?

- A. An IP trunk
- B. A DSI trunk
- C. A SIP trunk
- D. An analog trunk

Correct Answer: B

---

### QUESTION 4

You must set the calling privileges for a user so that the user can make calls but not receive calls. You assign COR to the user's station. What other settings must be completed?

- A. In COR 5, set calling party restriction = `origination` and called party restriction = `none`
- B. In COR 5, set calling party restriction = `outward` and called party restriction = `termination`
- C. In COR 5, set calling party restriction = `origination` and called party restriction = `termination`
- D. In COR 5, set calling party restriction = `none` and called party restrictions = `termination`

Correct Answer: D

---

### QUESTION 5

Communication Manager and system Platform each have their own backup function and each back up different data. For system Platform based systems, both backups need to be done routinely. What is a difference between the backup function for System Platform and Communication Manager?

- A. Only the Communication Manager backup can encrypt the file.
- B. Only the Communication Manager backup can be scheduled.
- C. Only the System Platform backup can use secure copy Protocols (SCP).

D. Only the System Platform backup can use secure file transfer protocol (SFTP).

Correct Answer: A
