QUESTION 1

When you upgrade Session Manager you had been using the hardware SM-100, the network connection of the SM-100 must be moved to which port on the Session Manager server?

A. eth2 port, labeled "2"

B. eth2 port, labeled "3"

C. eth0 port, labeled "1"

D. eth0 port, labeled "0"

Correct Answer: B

QUESTION 2

Session Manager has a routing policy that routes calls made to any number beginning with \\'100\\' to SIP Entity X. However, \\'sip.-1001avaya.com\\' is the SIP communication profile address of user Y. User Y is not currently registered (signed in) with Session Manager.

What will happen if Session Manager receives a call addressed to \\'sip.-1001avaya.com\\' and why?

A. It depends on the time ranges of the policy. If the call is placed inside a defined time range for the policy, the call will be routed to destination X. If not, then Session Manager will attempt to route the call to user Y. Since Y is not registered, the call will timeout, and the call will fail.

B. Since user Y is not currently registered, the call will be handled by the routing policy. If the call is placed during a time range specified by the policy, then the call will be routed to destination X. If not, then the call will fail.

C. Since the destination URI matches a communication profile SIP handle, Session Manager will not use the routing policy in handling the call. The call will fail since user Y is not currently registered.

D. Since the destination URI matches a routing policy dial pattern, Session Manager will give no consideration to the user Y registration status. If the call is made during a time range for the policy, the policy will be applied and the can will be routed to destination X. If not, then the original URI of \\'sip.-1001avaya.com\\' will be used as the destination to which Session Manager will route the call.

Correct Answer: C

QUESTION 3

R has started importing a file containing many user records. What will SMGR do if it encounters a record it cannot import?

A. It will abort the operation and roll back any successfully imported records from the import file.

B. Whether SMGR will abort and rollback the operation or continue processing records is entirely configurable.

C. Whether SMGR will abort or continue processing records is entirely configurable; but you cannot rollback successfully imported users.

D. It will continue processing the rest of the import file and collate the failures into a single XML document that can be retrieved following the import.

Correct Answer: B

QUESTION 4

On a SIP Entity that is defined as type session Manager, what should be defined?

A. an adaptation

B. listening ports

C. an outbound proxy

D. a credential name

Correct Answer: B

QUESTION 5

A technician wants to schedule a bulk operation to take place at a convenient time in the future. What are two methods for scheduling bulk operations? (Choose two.)

A. # Sh exportUpmUsers.sh -u admin -p adminl23 -t 2013:05:01:12:00:00

B. # sh exportUpmUsers.sh -u admin -p adminl23 -d 2013:05:01:12:00:00

C. Navigate to Users > User Management, click \\'More Options\\' and select \\'Import Users\\'. Choose \\'schedule\\' in the options.

D. Navigate to Users > User Management, click \\'More Options\\' and select \\'Export Users\\'. Choose \\'schedule\\' in the options.

Correct Answer: CD
