QUESTION 1

The System Manager administrator must consider the implications of restoring System Manager Data.

Which two restore-from-backup statements are true? (Choose two.)

- A. The restore operation will terminate all SIP sessions, and no SIP services will be available until the operation completes.
- B. The restore operation will take a varying amount of time depending on the amount of data.
- C. The restore operation will be scheduled for a time when the network is not busy.
- D. The restore operation will over-write all System Manager data held in the repository.

Correct Answer: BC

QUESTION 2

Type : Local Remote

* Remote Server IP : 135.124.228.111

* Remote Server Port : 22

* User Name : training

* Password : *****

* File Name : /tmp/backup Use Default

When performing a remote backup of system Manager data the administrator is asked for a user name and password. Which statement best explains why a user name and password are required?

- A. The backed-up data file is encrypted. The username and password are used in encryption process and subsequently to access the file on restoring backed up data.
- B. The backed-up data is stored on a remote server using SCP. The user name and password are used to login remote server.
- C. Because System Manager Date is being exported from the server for security and authentication purpose system Manager once again checks the administrator's credentials.
- D. All System Manager Data is backed up to common storage repository setup during installation. For system Manager to access the repository the correct user name and password must be supplied.

Correct Answer: B

QUESTION 3

While performing routine maintenance a technician has had to re-install System Platform. Which statement describes what must be done next?

- A. The SMGR Template must be installed.
- B. The SMGR Template must be installed, followed by the utilities domain (in that order),
- C. The utilities domain must be installed, followed by the SMGR Template (In that order),
- D. The Dom-0 must be installed, followed that order) by the utilities domain and then the SMGR Template (in that order).

Correct Answer: A

QUESTION 4

Which statement describes the relationship between System Manager and System Platform?

- A. System Platform hosts System Manager.
- B. System Platform provides access to System Manager's data repositories.
- C. System Manager is the User Interface through which System Platform is administered.
- D. System Manager and System Platform are peer applications, both installed on Avaya S8800 servers.

Correct Answer: A

QUESTION 5

Which two functionalities does the SIP firewall provide to protect Session Manager from SIP flood attack? (Choose two.)

- A. Removing the suspected source
- B. Rate Limiting
- C. Blocking the Entity Link
- D. Rate Blocking

Correct Answer: BD
