### QUESTION 1

The System Manager administrator must consider the implications of restoring System Manager Data. Which two restore-from-backup statements are true? (Choose two.)

- A. The restore operation will terminate all SIP sessions, and no SIP services will be available until the operation completes.
- B. The restore operation will take a varying amount of time depending on the amount of data.
- C. The restore operation will be scheduled for a time when the network is not busy.
- D. The restore operation will over-write all System Manager data held in the repository.

Correct Answer: BC

---

### QUESTION 2

An organization is adding four Session Managers installed to its network. The installation scripts for all four session Manager Instances have completed and all services have been started but none have yet been configured with Session Manager. The technician's task is to use System Manager to set up the four Session Managers in an in (n-1)/n redundant arrangement ready for adding users to redundant Session Manager Pairs. Which sequence best describes the tasks that are to be performed?

- A. Ensure that a Location and SIP Domain suitable for each Session Manager is defined. Add each Session Manager as a SIP Entity. Associate each Session Manager SIP Entity with a Session Manager instance. Set up Entity Links between each Session Manager.
- B. Define each Session Manager as a SIP Entity. Establish relationships between them by defining Routing Policies based on their respective locations. Add appropriate Adaptations to each Session Manager.
- C. Define each Session Manager as a SIP Entity by creating Entity Links. Create Communication Profiles for each Session Manager.
- D. Add each Session Manager as Routing Agents. Establish links between them by adding Locations. Mark each Session Manager as being 'active' or 'standby'.

Correct Answer: A

---

### QUESTION 3

Application definitions allow system administrators to define and manage individual applications each with their own attributes. The definitions allow administrators to add one or more such applications to which of the following?

- A. application programs
- B. application data sets
- C. application sequences
- D. application lists

---

Correct Answer: C

---

#### QUESTION 4

System Manager provides a Dashboard summary for monitoring and validating the health of each Session Manager instance. What information is not available from the Session Manager Dashboard?

- A. Service State
- B. Security Module status
- C. Entity Monitoring
- D. Managed Bandwidth status

Correct Answer: D

---

#### QUESTION 5

Why is FQDN resolution important between Session Manager and System Manager when the FQDN is unresolvable to either the Session Manager or System Manager?

- A. Session Manager node registration will fail during installation and data will not be replicated from System Manager to Session Manager.
- B. System Manager node registration will fail during installation and data will not be replicated from System Manager to Session Manager.
- C. Session Manager node registration will fail during installation and data will not be replicated from Session Manager to System Manager.
- D. Trust management will fail during installation and data will not be replicated from Session Manager to System Manager.

Correct Answer: A
