QUESTION 1

The IR team and the network administrator have successfully handled a malware incident on the network. The team is now preparing countermeasure guideline to avoid a future occurrence of the malware incident.

Which of the following countermeasure(s) should be added to deal with future malware incidents? (Select all that apply)

- A. Complying with the company's security policies
- B. Implementing strong authentication schemes
- C. Implementing a strong password policy
- D. Install antivirus software

Correct Answer: D

QUESTION 2

Which of the following standards is approved by IEEE-SA for wireless personal area networks?

- A. 802.11a
- B. 802.15
- C. 802.16
- D. 802.1

Correct Answer: B

QUESTION 3

Fill in the blank with the appropriate term. _____ is a prime example of a high-interaction honeypot.

Correct Answer: HoneyNet

HoneyNet is a prime example of a high-interaction honeypot. Two or more honeypots on a network form a HoneyNet. Typically, a HoneyNet is used for monitoring a larger and/or more diverse network in which one honeypot may not be sufficient. HoneyNets and honeypots are usually implemented as parts of larger network intrusion-detection systems. A honeyfarm is a centralized collection of honeypots and analysis tools.

QUESTION 4

Which of the following routing metrics refers to the time required to transfer the package to the source via the Internet?

- A. None

- B. routing delay
- C. length of the trail
- D. charge
- E. bandwidth

Correct Answer: B

QUESTION 5
