Correct Answer: D

---

### QUESTION 2

Suppose your company has just passed a security risk assessment exercise. The results display that the risk of the breach in the main company application is 50%. Security staff has taken some measures and implemented the necessary controls. After that, another security risk assessment was performed showing that risk has decreased to 10%. The risk threshold for the application is 20%. Which of the following risk decisions will be the best for the project in terms of its successful continuation with the most business profit?

- A. Accept the risk
- B. Introduce more controls to bring risk to 0%
- C. Mitigate the risk
- D. Avoid the risk

Correct Answer: A

---

### QUESTION 3

You are logged in as a local admin on a Windows 7 system and you need to launch the Computer Management Console from command line.

Which command would you use?

- A. `c:\compmgmt.msc`
- B. `c:\services.msc`
- C. `c:\ncpa.cp`
- D. `c:\gpedit`

Correct Answer: A

To start the Computer Management Console from command line just type `compmgmt.msc / computer:computername` in your run box or at the command line and it should automatically open the Computer Management console.
