QUESTION 1

Your customer is asking about the Multiple Appearance Directory Number (MADN) feature that has been added in support of CS1000 migrations. It includes Single Call Appearance/Arrangement (SCA) which works like Communication Manager bridging, and multiple Call Appearance/Arrange (MCA) which works like bridging on the CS1000.

Which statement about MCA is true?

A. It is only available on Avaya Equinoxclients.

B. It is only available on Device Adapted sets.

C. It is tied to a particular call appearance on the primary endpoint.

D. It makes all calls private.

Correct Answer: D

QUESTION 2

A customer with an Avaya Aura Platform requires survivable remote capabilities at their new branch location. The new branch location must also support five analog telephones and two Tl trunks.

What will address these requirements?

A. Communication Manager and Session Manager on Appliance Virtualization platform with local data switch

B. Communication Manager on Appliance Virtualization platform with local data switch

C. G430 with embedded S8300 with needed media modules

D. G450 with embedded S8300 with needed media modules

Correct Answer: A

QUESTION 3

Which change was made to EC500, to provide CS1000 Mobile-X like feature experience?

A. You can now put the call on hold before dialing a feature access code.

B. You can now dial a feature access code without putting the call on hold.

C. You can now enter a feature access code before receiving a call.

D. You must now enter feature access codes before you put a call on hold.

Correct Answer: A

QUESTION 4

A customer wants to ensure that their remote workers who access the Avaya core are authenticated by the Avaya Session Border Controller for Enterprise (SBCE).

What is the recommended location for the SBCE?

A. On the same virtual instance with Session Manager

B. In the Internet Service Provider network

C. Behind the firewall in the customers enterprise

D. In the customer\\'s DMZ

Correct Answer: C

QUESTION 5

For an Avaya Aura Communication Manager (CM) 7 Duplex Server hardware solution, what are two capabilities/requirements? (Choose two.)

A. Utility Server and Services Access Link (SAL) are required to be installed with both CM instances.

B. The duplex servers provide protection for both hardware and software server faults.

C. The duplex servers must run in an active-active mode for instantaneous failover.

D. Identical Servers are required.

Correct Answer: D
