QUESTION 1

You are reviewing a design done by another engineer, and want to be sure there are enough Touch Tone Receiver (TTR) resources.

Which component of the design uses TTR resources?

- A. H.323 endpoints
- B. SIP endpoints
- C. Analog endpoints
- D. SIP trunks

Correct Answer: C

QUESTION 2

If a customer has an Avaya Aura 7.0 and shuffling is turned on within Communication Manager, which statement describes the media processing resource (DSP) requirements for a two-party call originated statement describes the media processing resource (DSP) requirements for a two-party call originated by a SIP station and terminated by an .H323 IP Trunk being recoded?

- A. Multi-party (i.e. 3-party or greater) calls cannot shuffle, and require media-processing channels for the entire call.
- B. SIP-SIP two-calls calls will use SIP Direct Media, so no media-processing channels are required for this call.
- C. This call cannot shuffle, and one media-processing channel is required for the entire call.
- D. This call will shuffle after initial call set-up; i.e., one media-processing (DSP) channel is required for the first 20 seconds of the call, for each party.

Correct Answer: C

QUESTION 3

A customer with an Avaya Aura Platform requires survivable remote capabilities at their new branch location. The new branch location must also support five analog telephones and two TI trunks.

What will address these requirements?

- A. Communication Manager and Session Manager on Appliance Virtualization platform with local data switch
- B. Communication Manager on Appliance Virtualization platform with local data switch
- C. G430 with embedded S8300 with needed media modules
- D. G450 with embedded S8300 with needed media modules

Correct Answer: A

QUESTION 4

While working on a proposal that includes Avaya IX messaging you are comparing required features and licensing. Which Avaya IX Messaging feature requires an additional license?

- A. Text to Speech (TTS)
- B. Single sign on (SSO)
- C. Sync with Office 365 and Google emails
- D. Additional non-Avaya PBX integrations

Correct Answer: A

QUESTION 5

The account team is concerned about limitations associated with analog licenses that you have included in your solution design.

Which two characteristics of analog licenses would you share with the account team? (Choose two.)

- A. It is possible to uplift an analog license to a Core suite license.
- B. Analog users will get all benefits of a Core license user; the only difference is the device.
- C. Analog license users can coexist in the same Communication Manager with Mobility and Collaboration users.
- D. The percentage of analog licenses, within a solution, cannot exceed 60% of the total number of licenses.

Correct Answer: AC
