QUESTION 1

Select and Place:

List the various CAPWAP session establishment process steps sequentially. Drag the steps to the boxes at the right in the correct sequence.	
run state	Step 1
discovery request	Step 2
join response	Step 3
configuration status response	Step 4
join request	Step 5
DTLS session establishment	Step 6
configuration status request	Step 7
discovery response	Step 8

Correct Answer:

List the various CAPWAP session establishment process steps sequentially. Drag the steps to the boxes at the right in the correct sequence.	
	discovery request
	discovery response
	DTLS session establishment
	join request
	join response
	configuration status request
	configuration status response
	run state

QUESTION 2

Refer to the exhibit.

```
*Mar  1 06:08:34.769: dot1x-ev:dot1x_mgr_process_eapol_pak: dot1x eapol on dot11 interface
*Mar  1 06:08:34.769: dot1x-ev:dot1x_mgr_pre_process_eapol_pak: Role determination not required on Dot11Radio0.
*Mar  1 06:08:34.769: dot1x-err:No dot1x subblock
*Mar  1 06:08:34.769: dot1x-packet:dot1x_mgr_process_eapol_pak: queuing an EAPOL pkt on Authenticator Q
*Mar  1 06:08:34.769: AAA/AUTHEN/PFP (0000003D): Pick method list 'Permanent Local'
*Mar  1 06:08:34.769: dot1x-registry:registry:dot1x_ether_macaddr called
*Mar  1 06:08:34.769: %DOT11-7-AUTE_FAILED: Station 0024.d71a.e338 Authentication failed
```

You are troubleshooting a client that is not able to associate to an SSID configured on an autonomous AP. What is most likely the cause of the association failure, given the debug output seen in the exhibit?

A. The RADIUS server is not reachable.

B. The username and password combination is incorrect.

C. The SSID is secured with PSK and the shared secret is wrong.

D. There is no login method configured under the AAA configuration.

E. The aaa authentication command is pointing to a nonexistent RADIUS server.

F. The interface dot11radio0 does not require authentication and the client is requesting it.

Correct Answer: D

QUESTION 3

Which regulatory body develops standards for European information and communication technologies?

A. European Union

B. European Telecommunications Standards Institute

C. European Radio and Telecommunications Terminal Equipment Directive

D. International Organization for Standardization

Correct Answer: B

QUESTION 4

After performing a wireless site survey, you determine that to achieve proper HR-DSSS coverage within the rooms along a hallway area, the AP radios that service the hallway must be at 12 mW or higher. After the APs are all installed, you note that RRM is decreasing the power on the AP radios in the hallway to 6 mW. Which two methods can you use to prevent the HRDSSS AP radio power levels from dropping below 12 mW? (Choose two.)

A. Configure the minimum power-level assignment for the 2.4 GHz radio to 11 dBm under the individual TPC settings on the hallway APs.

B. Configure the minimum power-level assignment for the 5 GHz radio to 11 dBm under the individual TPC settings on the hallway APs.

C. Configure the minimum power-level assignment to 11 dBm under the global 802.11b/g/n TPC settings.

D. Configure the minimum power-level assignment to 11 dBm under the global 802.11a/n TPC settings.

E. Statically configure the 5 GHz radios on the hallway APs to power level 4.

F. Statically configure the 2.4 GHz radios on the hallway APs to power level 4.

Correct Answer: CF

QUESTION 5

What is the role of the IEEE regarding WLANs?

A. IEEE conducts certification testing to ensure that products from different vendors can interoperate.

B. IEEE provides guidance and creates regulations for each regulatory authority concerning spectrum usage, including frequency and power settings.

C. IEEE maintains and creates technical standards and protocols used by wireless LAN devices.

D. IEEE enforces standards and regulations within each regulatory domain and reports violations to appropriate authorities.

Correct Answer: C
