100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by Cisco
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

One of your customers is thinking of deploying wireless in a building. Which two items should you establish in a pre-site survey? (Choose two.)

- A. the exact channels that should be used
- B. the agreed coverage areas for the design
- C. the access security arrangements for getting into the building
- D. the type of deployment (data-only service, voice service, or location services)
- E. sources of RF interference

Correct Answer: BD

QUESTION 2

When designing a WLAN network using Cisco 1142 APs to support both voice services (Cisco 7921 IP Phones) and data services, what design principles are true? (Choose 2)

- A. 802.11n data rates should be enabled to improve overall performance even if the Cisco 7921 IP Phones do not support 802.11n data rates.
- B. 802.11n data rates should not be enabled as the Cisco 7921 IP Phones are not 802.11n capable. As such, no performance improvement is expected for the voice clients upon enabling 802.11n data rates.
- C. Ensure proper floor coverage to ensure good voice quality (-67 dBm, 20% cell overlap, and 19 dB channel separation).
- D. -67 dBm, 20% cell overlap, and 19 dB channel separation is impossible to achieve. Therefore, a site survey to ensure required RSSI coverage is top priority to ensure good voice quality.
- E. RRM should not be used as it is not designed for wireless voice services and will adjust the channel and Tx power settings to non optimized values for voice services.
- F. RRM should be used because it is the only way to ensure that channel and Tx power are configured to support voice services.

Correct Answer: AC

QUESTION 3

Which command can you use to configure the standalone AP to use the NTP server at IP address 192.168.1.99?

- A. ntp server 192.168.1.99
- B. snntp server 192.168.1.99
- C. ntp broadcast client 192.168.1.99

D. snmp broadcast client 192.168.1.99

Correct Answer: B

QUESTION 4

Select and Place:

What do these icons represent on a WCS floor map? Drag each icon on the left to its corresponding meaning on the right.

	<input type="text"/>	an AP with a major fault
	<input type="text"/>	an AP that has been administratively disabled
	<input type="text"/>	an unassociated AP
	<input type="text"/>	an unreachable AP

Correct Answer:

What do these icons represent on a WCS floor map? Drag each icon on the left to its corresponding meaning on the right.

<input type="text"/>		<input type="text"/>
<input type="text"/>		<input type="text"/>
<input type="text"/>		<input type="text"/>
<input type="text"/>		<input type="text"/>

QUESTION 5

Bandwidth-based Call Admission Control for voice services allows the client to request the required bandwidth or medium time to accept calls in a congested RF environment. Which three of these statements must be true in order for bandwidth-based CAC to correctly operate for voice calls? (Choose three.)

- A. WLAN must use the silver QoS profile
- B. WLAN must use the gold QoS profile
- C. WLAN must use the platinum QoS profile
- D. Client must support at least CCXv4
- E. Client must support at least CCXv3
- F. WMM does not need to be enabled for WLAN
- G. WMM must be enabled for WLAN

Correct Answer: CDG
