- ⚙️ **800,000+** Satisfied Customers

QUESTION 1

Which language defines the structure or modelling of data for NETCONF and RESTCONF?

- A. YAM
- B. YANG
- C. JSON
- D. XML

Correct Answer: B

QUESTION 2

When firewall capabilities are considered, which feature is found only in Cisco nextgeneration firewalls?

- A. malware protection
- B. stateful inspection
- C. traffic filtering
- D. active/standby high availability

Correct Answer: A

Malware protection IPS/IDS URL Filtering

QUESTION 3

In a Cisco SD-Access solution, which protocol is used by an extended node to connect to a single edge node?

- A. VXLAN
- B. IS-IS
- C. 802.1Q
- D. CTS

Correct Answer: C

SD-Access Extended Nodes provide the ability to extend the enterprise network by providing connectivity to non-carpeted spaces of an enterprise ?commonly called the Extended Enterprise. This allows network connectivity and management of IoT devices and the deployment of traditional enterprise end devices in outdoor and non-carpeted environments such as distribution centers, warehouses, or Campus parking lots. This feature extends consistent, policy-based automation to Cisco Industrial Ethernet, Catalyst 3560-CX Compact, and Digital Building Series switches and enables segmentation for user endpoints and IoT devices connected to these nodes. Using Cisco DNA Center automation, switches in the extended node role are onboarded to their connected edge node using an 802.1Q trunk

over an EtherChannel with one or multiple physical link members. Extended nodes are discovered using zero-touch Plug-and-Play.

QUESTION 4

In a Cisco SD-Access network where VXLAN is used for encapsulating data packets, what is the minimum MTU setting that devices should be configured with?

- A. 1492
- B. 1500
- C. 1518
- D. 1550

Correct Answer: D

QUESTION 5

Which statement about agent-based versus agentless configuration management tools is true?

- A. Agentless tools require no messaging systems between master and slaves.
- B. Agentless tools use proxy nodes to interface with slave nodes.
- C. Agent-based tools do not require a high-level language interpreter such as Python or Ruby on slave nodes.
- D. Agent-based tools do not require installation of additional software packages on the slave nodes.

Correct Answer: A
