⚙ **800,000+** Satisfied Customers

QUESTION 1

DRAG DROP

Drag and drop the deployment models from the left onto the corresponding explanations on the right.

Select and Place:

routed	A GRE tunnel is utilized in this solution.
passive	This solution allows inspection between hosts on the same subnet.
passive with ERSPAN	Attacks are not prevented with this solution.
transparent	This solution does not provide filtering between hosts on the same subnet.

Correct Answer:

	passive with ERSPAN
	transparent
	passive
	routed

QUESTION 2

A switch with Dynamic ARP Inspection enabled has received a spoofed ARP response on a trusted interface.

How does the switch behave in this situation?

A. It forwards the packet after validation by using the MAC Binding Table.

B. It drops the packet after validation by using the IP and MAC Binding Table.

C. It forwards the packet without validation.

D. It drops the packet without validation.

Correct Answer: C

QUESTION 3

When Cisco and other industry organizations publish and inform users of known security findings and vulnerabilities, which name is used?

A. Common Security Exploits

B. Common Vulnerabilities and Exposures

C. Common Exploits and Vulnerabilities

D. Common Vulnerabilities, Exploits and Threats

Correct Answer: B
