- ⚙️ **100% Money Back** Guarantee
- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

### QUESTION 1

What is a benefit of conducting device compliance checks?

- A. It indicates what type of operating system is connecting to the network.
- B. It validates if anti-virus software is installed.
- C. It scans endpoints to determine if malicious activity is taking place.
- D. It detects email phishing attacks.

Correct Answer: B

---

### QUESTION 2

An organization has a Cisco ESA set up with policies and would like to customize the action assigned for violations. The organization wants a copy of the message to be delivered with a message added to flag it as a DLP violation. Which actions must be performed in order to provide this capability?

- A. deliver and send copies to other recipients
- B. quarantine and send a DLP violation notification
- C. quarantine and alter the subject header with a DLP violation
- D. deliver and add disclaimer text

Correct Answer: D

### QUESTION 3

Which suspicious pattern enables the Cisco Tetration platform to learn the normal behavior of users?

- A. file access from a different user
- B. interesting file access
- C. user login suspicious behavior
- D. privilege escalation

Correct Answer: A

Table 1. Cisco Tetration platform primary features and benefits Feature Benefit Zero-trust model using microsegmentation Cisco Tetration platform allows only the required traffic between application components and users, blocking everything else. This approach prevents a persistent threat from entering or searching for additional vulnerabilities. Also allows for micro segmentation so you can deny file access from different users.

#### QUESTION 4

An engineer is configuring AMP for endpoints and wants to block certain files from executing. Which outbreak control method is used to accomplish this task?

- A. device flow correlation
- B. simple detections
- C. application blocking list
- D. advanced custom detections

Correct Answer: C

#### QUESTION 5

DRAG DROP

Drag and drop the security solutions from the left onto the benefits they provide on the right.

Select and Place:

Full contextual awareness	detection, blocking, tracking, analysis, and remediation to protect the enterprise against targeted and persistent malware attacks
NGIPS	policy enforcement based on complete visibility of users, mobile devices, client-side applications, communication between virtual machines, vulnerabilities, threats, and URLs
Cisco AMP for Endpoints	unmatched security and web reputation intelligence provides real-time threat intelligence and security protection
Collective Security Intelligence	superior threat prevention and mitigation for known and unknown threats

Correct Answer:

Cisco AMP for Endpoints
Full contextual awareness
Collective Security Intelligence
NGIPS
