Correct Answer:

Match the DNS header Rcode value on the left with the corresponding response code on the right.

	2
	0
	3
	b
	4

#### QUESTION 4

In Cisco IOS, what is the result of the ip dns spoofing command on DNS queries that are coming from the inside and are destined to DNS servers on the outside?

- A. The router will prevent DNS packets without TSIG information from passing through the router.
- B. The router will act as a proxy to the DNS request and reply to the DNS request with the IP address of the interface that received the DNS query if the outside interface is down.
- C. The router will take the DNS query and forward it on to the DNS server with its information in place of the client IP.
- D. The router will block unknown DNS requests on both the inside and outside interfaces.

Correct Answer: B

#### QUESTION 5

Which statement about the prelogin assessment module in Cisco Secure Desktop is true?

- A. It assigns an IP address to the remote device after successful authentication.
- B. It checks for any viruses on the remote device and reports back to the security appliance.
- C. It checks the presence or absence of specified files on the remote device.
- D. It clears the browser cache on the remote device after successful authentication.
- E. It quarantines the remote device for further assessment if specific registry keys are found.

Correct Answer: C
