### QUESTION 1

An architect is responsible for creating a new design to centralize the logging infrastructure for an existing vSphere environment. The key stakeholder in the project has provided the following list of requirements:

The management solution must forward all logs to the existing centralized Security Incident and Event Management (SIEM) solution.

The management solution must be a minimum of N + 1 resilient.

The management solution must provide the ability to view at least 2 months of live data.

The management solution must meet a monthly uptime SLA of 99.9%.

The management solution must support the collection of logs from ten geographically separated data center locations.

The management solution must support the collection of a minimum of 10,000 events per second.

Given the information from the stakeholder, which two statements would be considered functional requirements? (Choose two.)

- A. The management solution must be a minimum of N + 1 resilient.
- B. The management solution must meet a monthly uptime SLA of 99.9%.
- C. The management solution must provide the ability to view at least 2 months of live data.
- D. The management solution must forward all logs to the existing centralized Security Incident and Event Management (SIEM) solution.
- E. The management solution must support the collection of a minimum of 10,000 events per second.

Correct Answer: AC

---

### QUESTION 2

An architect is responsible for creating the design for vRealize Operations. The following requirements, constraints, and recommendations were gathered:

Enable Continuous Availability Monitor two physical locations The sizing guide recommends deploying 5 analytics nodes

What are two design considerations for the analytics node deployment? (Choose two.)

- A. High Availability will need to be enabled
- B. Extra Large Nodes must be used

- C. Two fault domains need to be created
- D. A sixth analytics node is needed
- E. Anti-affinity rules will need to be created

Correct Answer: BC

---

### QUESTION 3

A company has recently completed an audit and has found that there are many virtual machines in their production environment which no longer appear to be in use. To prevent this from happening in future, the company is deploying vRealize Automation and would like all provisioned VMs to meet following requirements:

VMs to have a default lease of 90 days and no more than 365 days Lease policy can be overridden on case by case basis Upon initial lease expiry, the VM should be kept for 10 days after which they will be destroyed

Which policy design will meet the technical requirements?

- A. Create a lease policy with the organization scope, setting 90 days lease, 365 total lease and grace period to 10 and a hard enforcement
- B. Create a lease policy with the organization scope, setting 90 days lease, 365 total lease and grace period to 10 and a soft enforcement
- C. Create a lease policy with the project scope, setting 90 days lease, 365 total lease and grace period to 10 and a soft enforcement
- D. Create a lease policy with the project scope, setting 90 days lease, 365 total lease and grace period to 10 and a hard enforcement

Correct Answer: C

---

### QUESTION 4

A customer has a requirement that an external auditing system must be updated when specific Cloud Templates are released.

Which combination of event topic and subscription filter would meet the customer's requirement? (Choose two.)

- A. "Cloud template version configuration" event topic
- B. "Cloud template configuration" event topic
- C. No filter
- D. Filter on "blueprintId"
- E. Filter on "eventTopicId"

Correct Answer: BD

---

---

### QUESTION 5

An architect is designing a certificate strategy for vRealize Operations (vROps) to satisfy the following requirements:

Enhance security  
Avoid browser warnings  
The certificate must be applicable for all vROps servers

Which three design decisions would fulfill the requirements? (Choose three.)

- A. Certificates will use the PEM format.
- B. Certificates will be created using the Diffie-Hellman security-key algorithm.
- C. Certificates will use the PFX and/or PKCS12 format.
- D. The solution will use CA-signed certificates.
- E. Certificates will use multiple Subject Alternative Name (SAN) entries.
- F. The solution will use self-signed certificates.

Correct Answer: ADE
