- ⚙️ **800,000+** Satisfied Customers

### QUESTION 1

A customer has requested a vSphere 6.5 deployment design where ESXi hosts are provisioned with Auto Deploy. The customer requires that certificates can be automatically refreshed and renewed from the vSphere Web Client for ESXi hosts.

Which certificate policy should be configured for vCenter Server?

- A. Thumbprint Mode
- B. VMware Certificate Authority
- C. Custom Certificate Authority
- D. Subordinate Certificate Authority

Correct Answer: B

"If VMCA assigns certificates to your ESXi hosts (6.0 and later), you can renew those certificates from the vSphere Web Client. You can also refresh all certificates from the TRUSTED\_ROOTS store associated with vCenter Server"

---

### QUESTION 2

Two DCs with 10mb circuit:

1.

This comprise of vSphere replication and srm in place for DR and recovery

2.

it can tolerate up to 1 hour of data loss

3.

the data change rate is about 10Gb/hour What would be the logical concept? (Choose Two)

- A. The company will be able to meet the RPO of 1 hour
- B. The company will not be able to meet the RPO of 1 hour
- C. Requirement: The distance between DCs will be less than 100KMs
- D. Constraint: vSphere replication must be utilized
- E. Assumption: the data center interconnects uses vSphere replication

Correct Answer: AC

---

### QUESTION 3

Drag each option to its appropriate concept.

Select and Place:

Option
Application licensing costs must be minimized.
vSphere 6.5 features will meet the technical requirements.
Existing Change Management guidelines must be followed.
Data center facilities are at capacity and need to be expanded.

Concept
Risk
Constraint
Assumption
Requiereement

Correct Answer:

Option

Concept
Data center facilities are at capacity and need to be expanded.
Existing Change Management guidelines must be followed.
Application licensing costs must be minimized.
vSphere 6.5 features will meet the technical requirements.

#### QUESTION 4

You have been tasked with creating a vSphere 6.5 data center design for an organization. The customer has decided to virtualize their database application and has provided specific design requirements. You must determine how these

requirements map to the design characteristic(s).

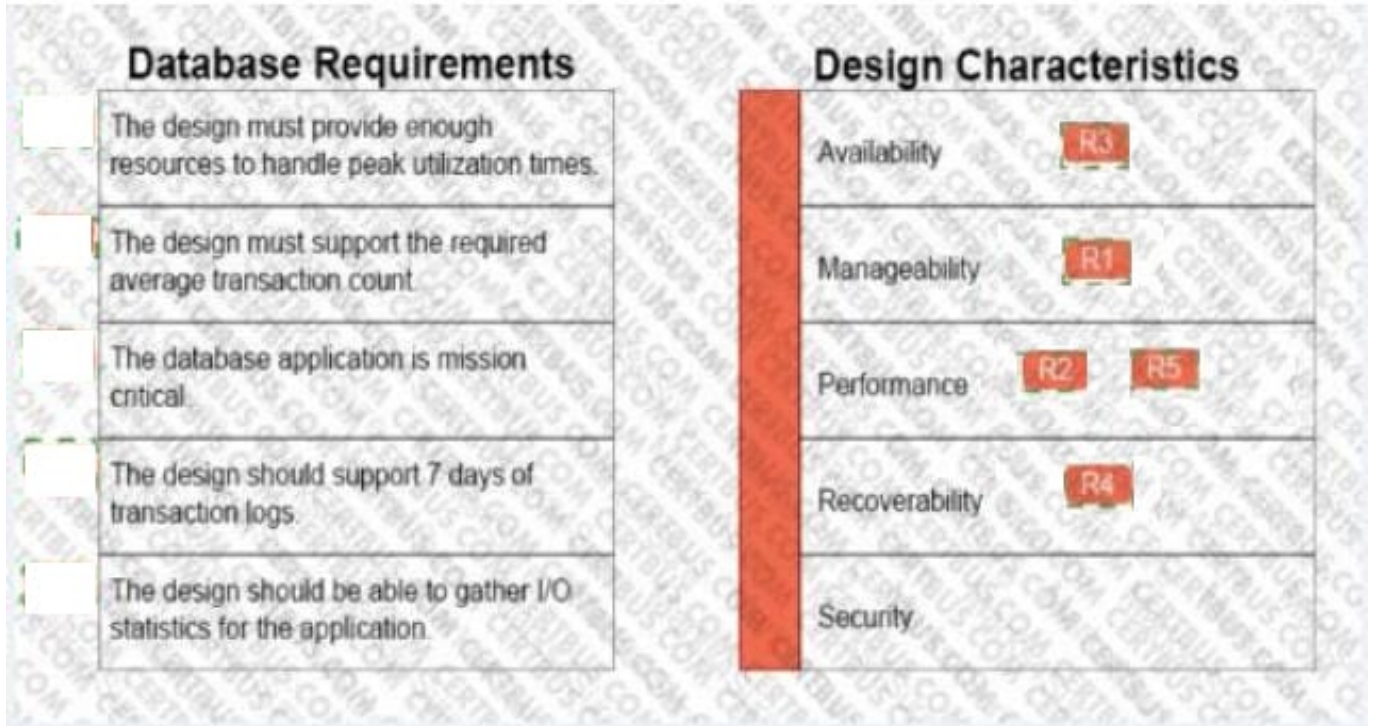

Match Database Requirements with Design Characteristics by dragging the red button (R1-R5) over the text of the appropriate Design Characteristic.

NOTE: Database Requirements can be mapped to more than one Design Characteristic.

Select and Place:

Database Requirements		Design Characteristics	
R1	The design must provide enough resources to handle peak utilization times.	Availability	
R2	The design must support the required average transaction count	Manageability	
R3	The database application is mission critical.	Performance	
R4	The design should support 7 days of transaction logs.	Recoverability	
R5	The design should be able to gather I/O statistics for the application.	Security	

Correct Answer:

### QUESTION 5

You have been tasked with creating a vSphere 6.5 design for an organization. The organization has a mission critical application that must be able to obtain its required CPU and memory resources even if contention occurs. You must determine which vSphere service(s) will allow for resources to be reserved.

Associate the vSphere Service on the left with the corresponding Reservation Type on the right by dragging the red button (S1-S6) over the text of the Reservation Type.

NOTE: A vSphere Service may allow for more than one Reservation Type or none at all.

Select and Place:

	vSphere Service	Reservation Type
S1	vSphere HA	Fully reserved guest CPU
S2	vSphere DRS	
S3	Vmware Fault Tolerance	
S4	Virtual NUMA (vNuma)	Fully reserved guest RAM
S5	Storage I/O Control	
S6	vMotion	

Correct Answer:

	vSphere Service	Reservation Type
S1	vSphere HA	Fully reserved guest CPU S1                  S6 S3                  S5
S2	vSphere DRS	
S3	Vmware Fault Tolerance	
S4	Virtual NUMA (vNuma)	Fully reserved guest RAM S1                  S3 S2                  S6
S5	Storage I/O Control	
S6	vMotion
