QUESTION 1

Which are three considerations to take into account when designing a fabric group? (Choose three.)

- A. Infrastructure resources can be organized into fabric groups and be assigned one or more fabric administrators to manage the resources in the fabric group.
- B. Once a fabric group is created in a specific tenant, its resources can only be consumed by members of business groups in that tenant.
- C. Fabric groups are required for virtual and cloud endpoints.
- D. Only resources that exist on the clusters selected for the fabric group are discovered during data collection.
- E. A fabric administrator can add or remove compute resources to and from a fabric group.

Correct Answer: ACD

QUESTION 2

An emerging software start-up company is growing rapidly. The Engineering department is looking to quickly scale its testing environment into the cloud. The vRealize Automation architect has been tasked with recommending the appropriate user role for a newlyformed integration team to integrate VMware vCloud Air into the Engineering Tenant. What is the minimum user role that must be granted to the integration team?

- A. Container Administrator
- B. Fabric Administrator
- C. Tenant Administrator
- D. IaaS Administrator

Correct Answer: C

QUESTION 3

A company is developing its storage-as-a-service solution using vRealize Automation. It has created a security group that will be assigned to the engineers developing this solution. Following the principle of least privilege, which role should be associated with this security group?

- A. XaaS architect
- B. Catalog administrator
- C. Infrastructure architect
- D. Application architect
- E. Tenant administrator

Correct Answer: D

QUESTION 4

A company's workload deployments from its VMware vRealize Automation environment have sustained a significant increase. Management has instituted a new SLA requirement for the deployment environment to guarantee availability to consumers.

Which three design recommendations will address the requirements of this scenario? (Choose three.)

- A. Deploy two Distributed Execution Manager (DEM) worker instances in the primary datacenter.
- B. Deploy one or more additional vRealize Automation appliances.
- C. Migrate a vRealize Orchestrator internal instance to a clustered external instance.
- D. Incorporate a load balancing solution.
- E. Migrate an internal vPostgres database to a clustered external instance.

Correct Answer: ABD

QUESTION 5

A business group manager has a maximum 300 virtual machine (VM) allocation allotted to the only reservation provided to its group. The business group manager must be notified within 24 hours of when the group's total count falls within 15 VMs of its limit. How should the architect design vRealize Automation to monitor and alert the business group manager when the group is at risk of exceeding its permitted allocation?

- A. Utilize the Event Broker to send a notification to the business group manager based on a trigger event of 285 or more VMs provisioned in the reservation.
- B. Within the appropriate reservation, create a custom property to send an email to the business group manager when the reservation exceeds 285 VMs.
- C. Within the appropriate reservation, enable Capacity Alerts, set the machine quota to 95% and select the option to send alerts to the business group manager.
- D. Within the business group, set the machine quota to 95% and enable business group manager alerts.

Correct Answer: C
