QUESTION 1

A company has decided to implement Workspace One on premise.

1.

 Workspace One portal will be used by end users to simplify access to web, mobile and Windows based applications.

2.

 As part of the solution, the company is planning on using Horizon 7 Application Publishing.

3.

 Published Applications will be used for applications frequently used by mobile users.

During a proof of concept (POC), users noted that it was too cumbersome to enter Active Directory username and password and RSA SecureID using mobile devices.

The Chief Security Officer (CSO) stated:

1.

 Multi-factor is a requirement for a subset of the applications.

2.

 End-users must have as seamless as possible authentication using mobile devices.

Which solution can satisfy the CSO\\'s requirements?

A. Implement VMware Identity Manager with Mobile SSO. Configure Access Policies to require RSA SecureID authentication for the subset of applications and implement TrueSSO in Horizon.

B. Implement VMware Identity Manager with VMware Verify for easy authentication. Since VMware Verify offers two factors no extra access policies is needed.

C. Implement VMware Identity Manager with Mobile SSO. Configure Access Policies to require VMware Verify authentication for the subset of applications and implement TrueSSO in Horizon.

D. Implement VMware Identity Manager with SSO. Configure Access Policies to require VMware Verify authentication for the subset of applications.

Correct Answer: C

QUESTION 2

A company is proposing:

1.

 All external network users will access their desktop using BLAST protocol. No other protocol will be used.

2.

 Device will NOT be allowed to be attached to PCs while users are outside of the internal network.

3.

 VMware Unified Access Gateways will be deployed behind a secure network and strict security requirements implemented.

A consultant was brought in to determine backend firewall port requirements to support the proposal.

What are the minimum required firewall rules between the Unified Access Gateway appliance and back end components?

A. Unified Access Gateway Appliance to View Connection Server or Load balancer on port 443 Unified Access Gateway Appliance to Remote Desktop on port 8443

B. Unified Access Gateway Appliance to View Connection Server or Load balancer on port 443 Unified Access Gateway Appliance to Remote Desktop on port 22443 Unified Access Gateway Appliance to Remote Desktop on port 32111

C. Unified Access Gateway Appliance to View Connection Server or Load balancer on port 80 Unified Access Gateway Appliance to View Connection Server or Load balancer on port 443 Unified Access Gateway Appliance to Remote Desktop on port 8443

D. Unified Access Gateway Appliance to View Connection Server or Load balancer on port 443 Unified Access Gateway Appliance to Remote Desktop on port 22443

Correct Answer: B

QUESTION 3

A customer is deploying a small Horizon View environment. It wants to minimize the number of connection servers required for the architecture while minimizing single points of failure and simplifying the user experience.

Which remote access method would accomplish this?

A. Security Servers

B. NSX load balancing

C. VPN Tunnel

D. Unified Access Gateway

Correct Answer: D

QUESTION 4

A customer is planning on implementing Horizon View. Security is a major concern. Only corporate managed Windows laptops should be able to access the Horizon environment from the Internet. Which solution should be implemented to support the requirement?

A. Deploy NSX. Use NSX feature to validate client\\'s MAC addresses and only allow registered clients.

B. Deploy VMware Identity Manager. Configure it to require RSA SecureID. Only install the RSA SecureID soft token software on managed devices. Configure Horizon to allow SAML.

C. Deploy View Security Server. Configure it to only allow domain joined computers accessing Horizon.

D. Deploy Unified Access Gateway. Configure it to require a device client certificate and to use pass-through authentication for Horizon. Distribute certificates to managed devices.

Correct Answer: D

QUESTION 5

A company wants to allow sales personnel to use laptops to access the internal VDI. Due to security constraints, VDI desktop pools for travelers will not be granted access to the Internet. Sales personnel however will be able to access links from email or other documents from their VDI sessions.

What can be implemented to meet these requirements?

A. Install View Agent with URL redirection enabled.

B. Install View Client with URL redirection enabled.

C. Enable clipboard sharing.

D. Enable Client Drive redirection.

Correct Answer: D
