QUESTION 1

The IT Team at a small company wants to use Horizon Apps to deploy a specialized 3D modeling application with image scanners using minimum storage space. It has installed RDS and the 3D application on a Master RDS VM.

What steps remains in the deployment?

- A. Install Horizon Agent on the Master RDS VM including the 3D RDSH and Scanner Redirection options Clone the Master RDS VM Create a manual RDS Farm using the clones Create a desktop pool Entitle the desktop pool
- B. Install Horizon Agent on the Master RDS VM including the 3D RDSH and View Composer options Create an automated RDS Farm using the Master RDS VM Create a desktop pool Entitle the desktop pool
- C. Install Horizon Agent on the Master RDS VM including the 3D RDSH and Instant Clone options Create an automated RDS Farm using the Master RDS VM Create a desktop pool Entitle the desktop pool
- D. Install Horizon Agent on the Master RDS VM including the 3D RDSH and Serial Port Redirection options Clone the Master RDS VM Create a manual RDS Farm using the clones Create a desktop pool Entitle the desktop pool

Correct Answer: A

QUESTION 2

The IT Team for a regional government organization wants to implement a VDI system using VMware products. These design requirements were specified:

1.
Automated Horizon RDS Farms and App Volumes to deliver a few Windows applications to iOS and Android devices
 2.
Horizon RDS Farms to deliver a specialized 3D mapping application
 3.
Stateless Windows 10 Horizon Instant Clone desktops to task workers, and Horizon Windows 10 desktops with a persistent data disk to power users
- What is the minimum number of Master Image VMs to support the design?

- A. 3
- B. 2
- C. 4
- D. 5

Correct Answer: B

QUESTION 3

A customer wants to deploy VMware Horizon View to support virtual desktops hosted in two different physical locations. It wants users to connect to the location nearest to them to start a session. Which three steps must be completed to enable this functionality? (Choose three.)

- A. Configure one View Pod spanning two sites.
- B. Initialize the Cloud Pod Federation.
- C. Configure Global Entitlements.
- D. Configure VMware User Environment Manager.
- E. Configure two View Pods.
- F. Configure Microsoft SQL Server Always On High Availability.

Correct Answer: ABD

QUESTION 4

During a planning meeting for an upcoming deployment of a Horizon View 7.1 environments, these requirements were identified by an architect:

1.
Separate pools for internal and external connectivity.
2.
Applications are not to be installed in the desktop VMs.
3.
Application assignments are to be user-based.
4.
No VPN is to be used.

Which three should the architect recommend to meet the requirements? (Choose three.)

- A. Use VMware Horizon View's tagging feature to identify external / internal pools.
- B. Use VMware App Volumes.
- C. Use ThinApp to stream the applications.
- D. Use VMware User Environment Manager to define network subnets that will filter the lists of external / internal desktop pools based on the user's client ip address.
- E. Use VMware NSX and deploy micro-segmentation rules that will filter the lists of external / internal desktop pools based on the user's client ip address.
- F. Use Horizon Security Server.

Correct Answer: ACF

QUESTION 5

Company A decided to start using GPO to optimize PCoIP across all their Horizon 7 Desktop pools. During the Proof of Concept (POC) on the local network, there were no performance issues. The company decided to move to UAT. Access from the outside network needs to be tested. Some sales staff traveling to overseas countries, where network speed is low, have reported that the screen quality is degraded during usage.

Which setting should be recommended to retain screen quality, regardless of a user's connection?

- A. Configure the PCoIP session bandwidth floor value.
- B. Configure PCoIP client image cache size policy.
- C. Turn on Build-to-Lossless feature.
- D. Configure the maximum PCoIP bandwidth session.

Correct Answer: C
