QUESTION 2

A university struggles with Windows application delivery for its students. Students only need a few applications, but since IT is not in control of the Windows versions on the endpoints, it has been a challenge. IT wants to allow for self-service to minimize administration. Despite self-service, IT must be able to revoke access to applications within 30 days from students leaving the University.

Which two solutions support the university\\'s requirements? (Choose two.)

A. Implement Horizon with Application Publishing and User Environment Manager to control access to individual applications.

B. Package the applications using ThinApp and present the packages to users using VMware Identity Manager.

C. Implement Horizon with Application Publishing and present entitlements using VMware Identity Manager.

D. Use ThinApp to package the applications for client Operating System independence and build a simple web portal allowing students to easily find and download the ThinApp packages.

E. Implement only VMware Identity Manager. Its portal is a complete applications solution and students can easily execute the Windows applications by only using a web browser.
