QUESTION 1

Drag and drop the Cisco Unified CM database replication status values on the left to the correct replication status definition on the right.

Select and Place:

0	Replication setup did not succeed
1	Logical connections successful and all tables match between servers
2	Incorrect replicate counts
3	Replication did not start or is still initializing
4	Logical connections established but tables did not match

Correct Answer:

	4
	2
	1
	0
	3

QUESTION 2

In addition to SIP triggers, which two trigger types can invoke applications on Cisco Unity Express? (Choose two.)

- A. HTTP
- B. IMAP
- C. VoiceView
- D. JTAPI
- E. Cisco Unified CM telephony
- F. voice mail

Correct Answer: AD

Triggers are incoming events that invoke application which in turn starts executing the script associated with that application. For example, the incoming event can be an incoming call or an incoming HTTP request. After you have created and

configured your application, you need to create a trigger on the Cisco Unity Express module to point to that application.

Cisco Unity Express supports three types of triggers:

?SIP triggers -- Use this type of trigger to invoke applications in Cisco Unified CME and Cisco SRST mode. This type of trigger is identified by the phonenumber which is dialed to invoke the desired application. ?JTAPI triggers -- Use this type

of trigger to invoke applications in Cisco Unified Communications Manager mode. This type of trigger is identified by the phonenumber which is dialed to invoke the desired application. ?HTTP triggers -- Use this type of trigger to invoke

applications using an incoming HTTP request. Such a trigger is identified by the URL suffix of the incoming HTTP request. This type of trigger can only be used if an IVR license has been purchased and installed on the system.

QUESTION 3

Within Infrastructure as a Service, which two components are managed by the provider? (Choose two.)

- A. data
- B. runtime
- C. servers
- D. applications
- E. networking

Correct Answer: CE

QUESTION 4

In a multicluster deployment model, a customer is using centralized TFTP service. Firewalls are being implemented between each of the clusters. After the installation of the firewalls, the centralized TFTP stopped serving files. What must be changed on the firewalls to fix this issue?

- A. Open TCP port 22 between the leaf clusters and the central cluster.
- B. Open TCP port 443 between the leaf cluster and the central cluster.
- C. Open TCP port 8443 between the leaf cluster and the central cluster.
- D. Open UDP port 69 between the leaf cluster and the central cluster.
- E. Open TCP port 80 between the leaf cluster and the central cluster.
- F. Open UDP port 500 to enable certificate synchronization between the TFTP servers.

Correct Answer: D

QUESTION 5

Which two types of patterns are always nonurgent in Cisco Unified Communications Manager version 11.0 (Choose two.)

- A. Voice Mail Directory Number
- B. Remote Destination Directory Number
- C. Voice Mail Pilot
- D. Hunt Pilot
- E. Route Pattern
- F. Translation Pattern

Correct Answer: AC
