QUESTION 1

While a configuration audit is performed on a router, the set session-key command is found under a crypto map applied to a WAN interface. Which three statements about this command are true? (Choose three)

- A. This command sets a peer authentication string because the IPsec peer does not support automatic mutual authentication and a manual method is required
- B. When configuring the Crypto map, (ipsec-manual) must be defined as part of the parameters
- C. This command is used to encrypt traffic to another device which does not support internet key exchange
- D. Another way of overcoming this issue is to use the crypto isakmp peer address command with an all zeros wildcard address and mask combination
- E. Both peers must be configured for manual peer authentication for this configuration to work
- F. This command is used to manually configure an IPsec SA: two entries are needed on each side to encrypt and decrypt traffic over the tunnel
- G. This command is used to manually configure an IPsec SA: only one entry are needed on each side to encrypt and decrypt traffic over the tunnel

Correct Answer: BEF

QUESTION 2

Which two characteristics of DTLS are true?(Choose two)

- A. It is used mostly by applications that use application layer object-protocols
- B. It includes a congestion control mechanism
- C. It completes key negotiation and bulk data transfer over a single channel.
- D. It supports long data transfers and connectionless data transfers.
- E. It cannot be used if NAT exists along the path.
- F. It concludes a retransmission method because it uses an unreliable datagram transport.

Correct Answer: BF

QUESTION 3

Which location for the PAC file on Cisco IronPort WSA in the default?

- A. http://:9001/pacfile.pac

- B. <http://:8022/pacfile.pac>
