-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

Which ArieOS release is the first to support New Mobility on the 2504 WLC ?

- A. 7.4.x
- B. 7.6.x
- C. 8.0.x
- D. 8.1.x

Correct Answer: B

---

### QUESTION 2

Which of the below characteristics of RPL is true?

- A. RPL is designed 1)or lossy networks.
- B. RPL is an IPv6 link-state routing protocol.
- C. RPL can send only messages in secured mode.
- D. RPL uses hello messages to send routing updates to its neighbors.

Correct Answer: A

From: <http://www.openmote.com/standards/ietf-rpl.html> <http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/rpl/configuration/15-mt/rpl-15-mt-book.html> [https://datatracker.ietf.org/doc/rfc6550/?include\\_text=1](https://datatracker.ietf.org/doc/rfc6550/?include_text=1)

### QUESTION 3

Which statement about the integration of ISE with Cisco Prime Infrastructure version 2.2 is true?

- A. Cisco Prime Infrastructure can display ISE profiling attributes for authenticated and unauthenticated clients.
- B. Cisco Prime Infrastructure can collect client authentication details from up to three configured ISE servers.
- C. ISE can be added to Cisco Prime Infrastructure only using user credentials of admin user configured locally on ISE
- D. When two instances of ISE are added to Cisco Prime Infrastructure. One must be working in secondary mode.

Correct Answer: D

## Getting Enhanced Client Information by Integrating with ISE

Prime Infrastructure manages the wired and the wireless clients in the network. When Cisco ISE is used as a RADIUS server to authenticate clients, the Prime Infrastructure collects additional information about these clients from Cisco ISE and provides all client relevant information to the Prime Infrastructure to be visible in a single console.

When posture profiling is enforced in the network, the Prime Infrastructure talks to Cisco ISE to get the posture data for the clients and displays it along with other client attributes. When Cisco ISE is used to profile the clients or an endpoint in the network, the Prime Infrastructure collects the profiled data to determine what type of client it is, whether it is an iPhone, iPad, an Android device, or any other device.

You can get enhanced information about managed clients using the Cisco Identity Services Engine (ISE) or ACS View servers.

If Prime Infrastructure is integrated with an ISE server (to access endpoint information), you can:

- Check an End User's Network Session Status.
- Use the User 360° View, you can identify possible problems with the end user's authentication and authorization for network access.
- Troubleshoot the User Application and Site Bandwidth Utilization.

Prime Infrastructure displays ISE Profiling attributes only for authenticated endpoints.

## Adding an Identity Services Engine

A maximum of two ISEs can be added to Prime Infrastructure. If you add two ISEs, one should be primary and the other should be standby. When you are adding a standalone node, you can add only one standalone node and cannot add a second node.

## Adding an Identity Services Engine

A maximum of two ISEs can be added to Prime Infrastructure. If you add two ISEs, one should be primary and the other should be standby. When you are adding a standalone node, you can add only one standalone node and cannot add a second node.

To add an Identity Services Engine, follow these steps:

- 
- Step 1** Choose **Administration > Servers > ISE Servers**.
  - Step 2** From the Select a command drop-down list, choose **Add ISE Server**, then click **Go**.
  - Step 3** Complete the required fields, then click **Save**.
- The credentials should be **superuser credentials local to ISE**. Otherwise, ISE integration does not work.
-

### QUESTION 4

Which technology is used by AVC on a Cisco WLC for identification and classification of applications?

- A. modular QoS CLI
- B. NBAR
- C. ACL
- D. IP precedence

Correct Answer: B

### QUESTION 5

DRAG DROP

Drag and drop the 802.11 technology feature on the left to the related frame type and IE on the right.

Select and Place:

Block-Ack	Channel Switch Announcement
Power Save Frame buffering	RNS Information element
802.11h (DFS)	Traffic Indication Map
WPA2	ADDBA Request/Response

Correct Answer:

	Power Save Frame buffering
	802.11h (DFS)
	WPA2
	Block-Ack
