QUESTION 1

CX-Tracer is an AppResponse Xpert module designed for increased visibility into:

- A. Real-time Citrix decodes
- B. Optimized traffic response times through the Riverbed Steelhead CX model appliances
- C. Front-end request to back-end connection mapping in Citrix XenApp environments
- D. User-to-Citrix desktop mapping in Citrix XenDesktop environments
- E. Citrix desktop server resource utilization measurements

Correct Answer: C

QUESTION 2

The AppResponse Xpert Database Troubleshooting Insight is useful when you want to: (Select 3)

- A. Identify databases and database applications contributing significantly to high response times.
- B. Define the performance of a specific database or database application by components such as SQL statements, database clients, and tags.
- C. Troubleshoot a specific SQL statement in detail.
- D. Monitor database server metrics, such as CPU and memory utilization.

Correct Answer: ABC

QUESTION 3

What three functionalities are included in the AppTransaction Xpert Advanced version but not in the Standard version? (Select 3)

- A. Continuous capture on AppTransaction Xpert agents
- B. Scheduled captures
- C. WAN acceleration capture and import
- D. Trace explorer

Correct Answer: ABC

QUESTION 4

Which of the following statements are true? (Select 3)

- A. By default, anyone who can authenticate to the OPNET Authorization Server can create their own dashboard.
- B. Dashboards can be shared so that authentication is not required, and right-click integration is fully functional.
- C. Being able to view a dashboard panel lets you adjust its time range and copy the panel to your own dashboard for further editing.
- D. External content can be inserted into any dashboard by using the Auxiliary Panel content type.

Correct Answer: ACD

QUESTION 5
