QUESTION 1

How can dashboards be shared? (Select 2)

- A. By having many people log in with the same account
- B. By clicking on the Link tool to create a unique URL for the dashboard
- C. By exporting the dashboard as a report

Correct Answer: AB

QUESTION 2

Riverbed Performance Management allows you to view an application from end-to-end by instrumenting:

- A. Each web page associated with the application
- B. A back-end data adapter that identifies and tracks all tiers of the application
- C. The front-end web application with JavaScript and the application tiers with agents
- D. The front-end web application with agents and the back-end with specified scripts

Correct Answer: C

QUESTION 3

Which of these is not an available data source for Dashboards?

- A. AppInternals Xpert
- B. AppResponse Xpert
- C. BrowserMetrix
- D. AppTransaction Xpert

Correct Answer: D

QUESTION 4

In a three-tier application with a web front-end, application middle tier, and database back- end, where is the best instrumentation point for end-to-end visibility?

- A. It is best to instrument at all tiers for maximum visibility.
- B. It is best to instrument at the web tier, since that is typically the client entry point into the application.

C. It is best to instrument at the application tier, since it sits between the web and database tiers.

D. It is best to instrument at the database tier, since it holds the data the client is requesting.

Correct Answer: A

QUESTION 5

AppResponse Xpert's Application Stream Analysis calculates metrics for which built-in groups, without configuration? (Select 3)

A. Business group

B. Web application

C. IP address

D. Classless Inter-Domain Routing (CIDR) subnet
