Help

Correct Answer:

Item 45 of 66

Time Remaining: 1:06:28

**Point and Click**

Click the Point and Click button to begin.

An employee resigned his position in your company today. You need to remove his user object in the tree. Click on the iManager option you would use to do this.

The screenshot shows the Novell iManager web interface. The title bar says 'Point and Click'. The main header is 'Novell iManager' with 'Collection Owner Access' below it. A toolbar contains various icons. The user is logged in as 'admin.SLC.DA.DA-TREE'. On the left is a 'Roles and Tasks' sidebar with a list of options: Archive / Version Management, Cluster Administration, DHCP, DNS, Dynamic Groups, eDirectory Administration, eDirectory Maintenance, File Access (NetStorage), File Protocols, Groups, Help Desk, and Install and Upgrade. The main content area shows 'Novell iManager Version 2.0.2' and a message: 'You are currently logged in as user admin.SLC.DA in the tree with Collection Owner access.' The background of the main area shows a faint image of a mechanical part.

### QUESTION 3

Which property right allows a trustee of an object to add or remove its name as a value of the object property?

- A. Read
- B. Write
- C. Modify
- D. Delete
- E. Browse
- F. Add Self
- G. Rename
- H. Compare
- I. File Scan

---

J. Inheritable

Correct Answer: F

---

#### QUESTION 4

You're designing your organization's eDirectory tree. You want to create Country objects at the top of your tree for each country where your organization has an office. Each of these offices has a regional network administrator. You decide to create an object named Admin in each respective Country object for each regional administrator. Will this tree design work?

- A. Yes, all eDirectory rules have been observed.
- B. No, eDirectory object names must be unique within the tree.
- C. No, user objects can't reside in Country container objects.
- D. No, eDirectory must be managed centrally. You shouldn't use distributed administrators.
- E. No, the name of Admin is reserved for the user object that's created during the first server install.
- F. No, eDirectory requires that trees be designed by departmental organization, not by geographic region.

Correct Answer: C

---

#### QUESTION 5

Which term describes the way rights granted to a container object flow down to all objects within the container?

- A. Filtering
- B. Inheritance
- C. Replication
- D. Partitioning
- E. Synchronization
- F. Distributed Administration

Correct Answer: B
