**QUESTION 1**

Your organization uses a database application to store names and addresses used in direct-mail campaigns. As the demand for your company\\'s products has grown, the database file has become very large. Which file attribute could you assign to the database file to keep it as small as possible by running the NetWare compression routine every time the file is modified instead of at the system-specified compression start time?

A. A

B. H

C. P

D. Ci

E. Dc

F. Di

G. Dm

H. Ds

I. Ic

J. Ro

K. Sh

Correct Answer: I

**QUESTION 2**

You\\'re implementing OES NetWare for a small business client: Jessica\\'s Bakery. There is only one server in the network. You\\'ve named the server BAKERY1 and installed it into an eDirectory tree named JESSICASBAKERY-TREE. You\\'ve

used a random password generator to create a password for the tree\\'s Admin user.

You\\'ve placed the server hardware next to the point-of-sale system in the customer area of the bakery. All workstations have the latest Novell Client installed on them. You created a directory named SHARED on the server\\'s DATA volume

where employees can share files. Does this configuration meet Novell\\'s security recommendations?

A. Yes, all Novell Security guidelines have been met.

B. No, you shouldn\\'t use shared directories.

C. No, the server should be located in a locked room.

D. No, passwords created with a random password generator aren\\'t complex enough.

E. No, you shouldn\\'t use the business name in the server or eDirectory tree names.

Correct Answer: C

---

QUESTION 3

You\'re designing the eDirectory tree for your company. Your company is composed of four distinct subsidiary organizations. You decide to create four Organization objects at the root of your tree to represent each. Each subsidiary has its own Vice President who is in charge of the organization. You decide to create a user object for each Vice President in their respective Organization object. Will this design work?

A. Yes, all eDirectory rules have been observed.

B. No, user objects can\'t reside within an Organization object.

C. No, Organization objects can only reside within Country objects.

D. No, there can only be one Organization object within a given tree.

E. No, Organization objects should not be used to represent subsidiaries. Organizational Unit objects should be used instead.

Correct Answer: A

---

QUESTION 4

One of your clients owns a company that runs three shifts of employees each day. To save money, the client has purchased only enough workstations for a single shift of employees. Each employee shares his or her computer with two other employees who work different shifts. The client has a very high employee turn-over rate. The average employee only works there for 6-9 months. Based on this information, which of the following security policies should you consider implementing? (Choose 2.)

A. Force periodic password changes.

B. Use a volume other than SYS for home directories.

C. Restrict user logins times to the user\'s shift hours.

D. Avoid assigning rights through the All Properties option.

E. Assign file attributes in addition to file trustee assignments.

Correct Answer: AC

---

QUESTION 5

You need to create a new user object in your eDirectory tree using the ConsoleOne management utility. You don\'t have ConsoleOne installed on your local Windows workstation, so you must run it from your OES NetWare server. Where should you look in the server\'s file system for the ConsoleOne.exe executable?

A. Sys:\Public\bin

B. Sys:\Public\Win32\ConsoleOne

C. Sys:\Public\Mgmt\ConsoleOne\1.2\bin

D. Sys:\Public\WINNT\ConsoleOne\1.2\bin

Correct Answer: C
