QUESTION 1

Which feature of Cisco Web Security leverages the Outbreak Intelligence Engine to scan individual pieces of websites before allowing access?

- A. Antivirus Monitoring
- B. Dynamic Content Analysis
- C. Real-time Sandboxing Analysis
- D. Visibility control

Correct Answer: C

ASAS Security Web and Email SE Module 2

QUESTION 2

Which of AMP's File capabilities deals with the problem of files passing through perimeter defenses that are later discovered to be a threat?

- A. Dynamic Analytics
- B. Trajectory
- C. Malware Security
- D. File Retrospection

Correct Answer: D

Tracks the spread of any file within your network and continuously monitors file reputation over time. If a file reputation changes to malicious or is found by file sandboxing to be malicious, AMP provides retrospective alerting in the after phase. AMP identifies every instance of the file within your network to address the problem of malicious files passing through perimeter defenses that are later deemed a threat. Reference:
