#### QUESTION 1

Which of the following statements are NOT true about stored procedure replication?

- A. Request functions are replicated from the primary to the replicate database.
- B. Use `sp_setrepproc` to mark a stored procedure for replication.
- C. Request functions cannot be executed in a Warm Standby environment.
- D. Request functions do not require a subscription.

Correct Answer: A

---

#### QUESTION 2

In an existing table level replication setup, if a column is added to a primary table, then an administrator has to

- A. Recreate only the subscription.
- B. Recreate only the Replication Definition.
- C. Recreate the Replication Definition as well as the subscription.
- D. Add the same column to the replicate table and alter the Replication Definition.

Correct Answer: D

---

#### QUESTION 3

Which of the following is TRUE when creating a route from a primary replication Server using an ERSSD to a destination Replication Server?

- A. A Rep Agent must be created in the ERSSD prior to issuing the route command.
- B. The name of the Rep Agent must be added to the local interfaces file.
- C. The user specified in the create route command must exist in the primary Replication Server.
- D. The destination Replication Server must also be using an ERSSD.

Correct Answer: B

---

#### QUESTION 4

Which of the following are TRUE about Semiautomatic Warm Standby? (Choose 2)

- A. DDL always replicates.

- B. Switchover is instantaneous.
- C. Entire database marked with sp\_reptostandby.
- D. Individual objects are marked with sp\_setreptable.
- E. Subsets of the database may be replicated instead of the whole database.

Correct Answer: DE

---

#### QUESTION 5
