QUESTION 1

Which two network types can be extended with VMware HCX Network Extension? (Choose two.)

- A. vSphere Distributed Switch VLAN Networks
- B. NSX Overlay Networks
- C. Trunk Networks
- D. vSphere Standard Switch VLAN Networks
- E. Private VLAN Networks

Correct Answer: AB

QUESTION 2

An administrator is deploying a VMware Cloud on AWS software-defined data center (SDDC) in an AWS region and needs to plan for mission-critical application availability across availability zones. Which AWS Virtual Private Cloud (VPC) configuration needs to be in place in order to accomplish this?

- A. One AWS VPC with four subnets, one per availability zone
- B. Two AWS VPCs with two subnets, two per availability zone
- C. One AWS VPC with two subnets, one per availability zone
- D. Four AWS VPCs with two subnets, two per availability zone

Correct Answer: B

QUESTION 3

When deploying within VMware Cloud on AWS, which three VMware Horizon features are supported? (Choose three.)

- A. Linked clone desktops
- B. Instant clone desktops
- C. Full clone Remote Desktop Session Hosts (RDSH)
- D. Persona management
- E. Unmanaged desktops
- F. Full clone desktops

Correct Answer: BCF

**QUESTION 4**

A company is operating a main data center and two smaller data centers in branch offices. The main data center is being replicated to a disaster recovery site at a co-located data center with a recovery point objective (RPO) of five minutes and a recovery time objective (RTO) of two hours. The branch data centers are shipping backup tapes to the main data center on a weekly basis. What would be a cost-efficient VMware solution that would improve RTO and RPO for the branch office data centers while maintaining the recovery time for the main data center?

- A. Create a software-defined data center (SDDC) in VMware Cloud on AWS. Create a shared content library and let the branch offices subscribe to it. Export the virtual machines in the branch offices to OVF files on the shared content library on a weekly basis.
- B. Create a software-defined data center (SDDC) in VMware Cloud on AWS. Migrate the disaster recovery solution from the co-located data center to the VMware Cloud on AWS SDDC. Create regular copies of the virtual machines at the branch offices and use AWS Snowball to directly ship the copies to an AWS data center and store them on AWS S3 buckets.
- C. Create a software-defined data center (SDDC) in VMware Cloud on AWS. Activate VMware Site Recovery. Replace the co-located disaster recovery (DR) site for the main data center with VMware Site Recovery. For the branch offices, implement VMware Cloud Disaster Recovery (VCDR).
- D. Create a software-defined data center (SDDC) in VMware Cloud on AWS. Replace the co-located site for the main data center and the backup tape shipping for the branch offices with VMware Cloud Disaster Recovery (VCDR).

Correct Answer: A

QUESTION 5

What is the maximum Gbps of bandwidth that each AWS Elastic Network Adapter (ENA) provides on a i3.metal host?

- A. 25 Gbps
- B. 50 Gbps
- C. 10 Gbps
- D. 100 Gbps

Correct Answer: A
