QUESTION 1

Which statement is true regarding VMware Cloud Director App Launchpad?

- A. It only provides a pre-packaged public catalog that allows Service Providers the ability to pre-configure sizing templates for application deployment, simplifying the tenant experience.
- B. It only provides pre-packaged, publicly available applications from the VMware Marketplace that must be configured every time they are deployed.
- C. It provides a pre-packaged public and custom application catalog that allows Service Providers the ability to pre-configure sizing templates for application deployment, simplifying the tenant experience.
- D. It provides both pre-packaged, publicly available applications from the VMware Marketplace as well as custom-build applications, but the properties must be configured by the tenant every time they want to deploy one.

Correct Answer: B

QUESTION 2

An individual is logged into the VMware Cloud Director tenant portal as organization administrator and would like to create a direct organization virtual data center network. The individual, however, receives a message that insufficient rights are held.

Which role is needed to complete this task?

- A. vApp author
- B. System administrator
- C. Catalog author
- D. Tenant administrator

Correct Answer: B

QUESTION 3

An administrator is planning a new VMware Cloud Director deployment and is concerned about secure communications between the clients and servers.

Which two recommended steps would ensure secure communications between the clients and servers? (Choose two.)

- A. VMware Cloud Director automatically creates self-signed certificates.
- B. Create a single certificate for each member of the server group, and import the certificates into the host keystores.
- C. Create two certificates for the server group, and import the certificates into each cell's keystore.
- D. Create a single certificate and upload it through the Service Provider Portal to all members of the server group.

E. Create or use an existing wildcard certificate, and import it into each cell's keystore.

Correct Answer: CE

QUESTION 4

The system administrator has to configure transfer server storage during the deployment of a VMware Cloud Director appliance.

What are two purposes of this storage? (Choose two.)

- A. For VMware Cloud Director appliance database backups
- B. As temporary storage for vApp and media uploads and downloads
- C. Used when upgrading a vSphere datastore to a newer VMFS version
- D. For network traffic when Cross-VDC Networking is enabled
- E. Used during Storage vMotion based migration of virtual machines

Correct Answer: AB

QUESTION 5

An administrator is configuring a load balancer for multiple VMware Cloud Director appliances for the console proxy.

Which port number should the administrator use?

- A. 443
- B. 902
- C. 8443
- D. 5480

Correct Answer: C
