### QUESTION 1

During a VMware SD-WAN design session for a core business application, a customer expressed the following requirements:

Allow business abstraction so that similar policies can be applied across different hardware types.

Eliminate the need for the operations team to know the type of physical connectivity or the WAN carrier.

Maintain SLA for real-time application.

Which design should be taken in terms of Link Steering?

- A. Select WAN Link, and then define the DSCP tagging
- B. Select Error Correct Before Steering with % definition
- C. Select Transport Group, and then select Preferred option.
- D. Deselect Error Correct before Steering Defaults.

Correct Answer: A

---

### QUESTION 2

Which statement is correct about VMware SD-WAN Orchestrator user roles and their associate privileges?

- A. Customer Support User can view and manage then company\\'s network
- B. Standard Admin User can view but cannot manage their customer.
- C. Superuser: User can view but cannot create additional admin.
- D. Enterprise read only: User can view but not modify configurations.

Correct Answer: A

---

### QUESTION 3

A customer has a 10,000 branch site requirement arid must use a hub cluster in their design. Which Mware SO- WAN best practice should be used when designing the cluster?

- A. BGP on WAN side
- B. Static routing
- C. MP BGP south bound
- D. BGP on LAN side

Correct Answer: C

---

#### QUESTION 4

The VMware SD-WAN solution is comprised of Orchestrator, Gateway, and Edge. The architecture ensures separation and secure communication between the management, control, and data plane of the solution. The management plane consists of the VMware SD-WAN Orchestrator, and the control plane is comprised of the VMware SD-WAN Gateway/Controller. Which statement correctly describes this situation?

- A. VMware SD-WAN Edges/Gateways establishes a Transport Layer Security (TLS) 1.2 encrypted session to the VMware SD-WAN Orchestrator
- B. To make the entire solution to work properly, TCP port 443 and HOP port 500 and UDP port 4500 are required to open in the firewall rule, if Edge is deployed behind a Firewall.
- C. There is impact on data plane when the Edge loses connectivity to the management plane. The operator only loses the visibility of the Edge from Orchestrator and cannot make configuration changes on the Edge until the management plane connectivity is resumed.
- D. Traffic between VMware SD-WAN Edges and from VMware SD-WAN Edges to VMware SD-WAN Gateways uses VMware SD-WAN Management Protocol (VCMP) tunneling over User Datagram Protocol (UDP) port 2427. secured with Internet Protocol Security (IPSec)

Correct Answer: D

---

#### QUESTION 5

A customer would like to use a VNF firewall on the VMware SD-WAN 600 series Edge. Where do the Edge firewall rules of the VNF apply?

- A. Underlay
- B. Overlay
- C. WAN side
- D. LAN side

Correct Answer: C
