QUESTION 1

Drag the protocol on the left to the node on the right that it runs between.	
GTP-U	eNodeB and MME
NAS	HSS and MME
Diameter	eNodeB and SCW
S1-AP	UE and MME

Select and Place:

Drag the protocol on the left to the node on the right that it runs between.	
GTP-U	eNodeB and MME
NAS	HSS and MME
Diameter	eNodeB and SCW
S1-AP	UE and MME

Correct Answer:

Drag the protocol on the left to the node on the right that it runs between.	
	S1-AP
	Diameter
	GTP-U
	NAS

QUESTION 2

Which statement describes what occurs during an inter-MME tracking area update procedure?

- A. The old MME does the integrity check of the context request by using the old GUTI in the context request message.
- B. The SGW change indication is conveyed to the old MME in the context ack message.
- C. The SGW change indication is conveyed to the old MME in the context request message.
- D. The old MME does the integrity check of the context request by using the PTMSI signature in the context request message.

Correct Answer: B

QUESTION 3

Which statement describes what occurs with a UE in an active Voice over LTE call being handed over successfully from the 4G LTE network to the 3G network via enhanced SR-VCC technology?

- A. The voice call is interrupted and reconnected during the hand-over.
- B. The voice call must be handed over to Voice over HSPA in 3G network.
- C. The voice call uses a circuit-switched connection in the 3G network.
- D. The voice call is handed back to 4G Voice over LTE when coverage is back.

Correct Answer: C

QUESTION 4

Which two APN names are recommended by GSMA IR.88 / IR.92 in the Voice over LTE solution? (Choose two.)

- A. Voice
- B. Emergency
- C. SOS
- D. IMS
- E. Video
- F. SIP

Correct Answer: CD

QUESTION 5

Which option describes where the Sp reference point is located?

- A. between PCRF and SPR
- B. between PCRF and the application function
- C. between PGW and trusted non-3GPP IP access
- D. between PCRF and ePDG

Correct Answer: A
