QUESTION 1

How will the Cisco UCS Manager react when all of the FSM tasks fail?

- A. retries for 60 seconds
- B. raises faults and alarms
- C. restarts from the previous known good task
- D. sends an NOC SNMP trap email

Correct Answer: B

QUESTION 2

During a Cisco UCS firmware update via the UCS Manager GUI, you choose All from the Filter list in the Activate Firmware dialog box. Which statement about this action is true?

- A. Because many releases and patches have dependencies that require a specific order, this method is not preferred, and you should consult the release notes.
- B. This setting will work and UCS Manager will properly activate all elements in the correct order.
- C. This setting will have no effect, and you should always use the CLI to complete firmware upgrades.
- D. You should open a case with Cisco TAC to determine what to do.

Correct Answer: A

QUESTION 3

Instructions

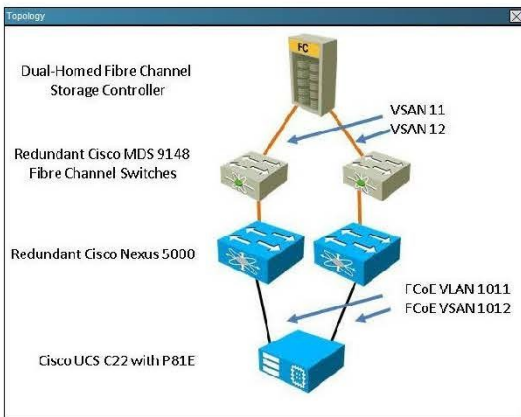

- THIS TASK DOES NOT REQUIRE DEVICE CONFIGURATION.
- Before beginning the questions, carefully read the information in the Scenario tab and familiarize yourself with the network topology.
- To access the multiple-choice questions, click on the numbered boxes on the left of the top panel.
- There are four multiple-choice questions with this task. Be sure to answer all four questions before clicking the Next button.
- Use the tabs at the bottom of the question to navigate between the Topology and question-specific Exhibits. Exhibit_1 maps to Question 1, et cetera.

Scenario

You have received a trouble ticket from a customer with multiple FCoE issues deploying a Cisco UCS C22 M2 server. The server includes a Cisco UCS P81E VIC that has redundant connections to Cisco Nexus 5548 switches.

When the customer loads the installer for VMware ESXi 5.0, it is unable to connect to its boot LUN over Fabric A or Fabric B. To begin, you will concentrate your efforts on achieving connectivity on Fabric A.

The customer is a government agency with an information security policy prohibiting remote access into its network. It has provided a topology, command output from the Nexus 5548, and screenshots from the Cisco Integrated Management Controller of symptoms for you to troubleshoot.

Questions

1 Review the screenshot the customer emailed to you in the tab **Exhibit_2**.

2

3 You are viewing the vHBA definition for interface fc0 connected to Fabric A. Which two

4 items are not configured correctly? (Choose two.)

- The WWPN should always begin with 50 in the first byte to signify it is an FCoE initiator.
- According to T11 standard FC-BB-5, the first 4 bytes of an FCoE WWNN and WWPN must be unique from each other.
- The FC SAN Boot checkbox must be selected.
- Beginning with VMware ESXi 5.0, the Enable Persistent LUN Binding option must be checked.
- The default VLAN should be set as the FCoE VLAN.
- FCoE boot interfaces must be set to PCIe Device Order 0.

QUESTION 4

The Cisco UCS Manager displays FSM information for which four of these? (Choose four.)

- A. which FSM task is being executed
- B. the current state of an FSM task
- C. the status of the previous FSM task
- D. any error codes returned while processing
- E. all completed FSM tasks
- F. multiple FSM tasks that completed over multiple tries
- G. multiple FSM tasks that failed

Correct Answer: ABCD

QUESTION 5

Which feature on the Cisco IMC GUI allows you to view the last boot post operation?

- A. Firmware Management tab
- B. Bootstrap Process Recording
- C. Crash Recording
- D. Trusted Platform Module

Correct Answer: B
