QUESTION 1

You work as a network administrator for your company. Study the exhibit carefully. ASDM is short for Adaptive Security Device Manager. You are responsible for multiple remote Cisco ASA security appliances administered through Cisco ASDM. Recently, you have been tasked to configure one of these Cisco ASA security appliances for SSL VPNs and are requiring a client certificate, as shown. How will this configuration affect your next ASDM connection to this Cisco ASA security appliance?

Configuration > Remote Access VPN > Network (Client) Access > SSL VPN Connection Profiles

The security appliance automatically deploys the Cisco AnyConnect VPN Client or legacy SSL VPN Client to remote users upon connection. The initial client deployment requires end-user administrative rights. The Cisco AnyConnect VPN Client supports the HTTPS/TCP (SSL) and Datagram Transport Layer Security (DTLS) tunneling options.

(More client-related parameters, such as client images and client profile, can be found in the [Client Settings](#).)

Access Interfaces

Enable Cisco AnyConnect VPN Client or legacy SSL VPN Client access on the interfaces selected in the table below

Interface	Allow Access	Require Client Certificate	Enable DTLS
outside	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
dmz	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
inside	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Access Por: 443 DTLS Por: 443

Click here to [Assign Certificate to Interface](#).

- A. You would be asked to present an identity certificate. If you did not have one, the Cisco ASA security appliance would prompt you for authentication credentials, consisting of a username and password.
- B. Your connection would be handled the way it is always handled by this Cisco ASA security appliance.
- C. You would be required to have an identity certificate that the Cisco ASA security appliance can use for authentication.
- D. You would be required to download the identity certificate of the remote Cisco ASA security appliance.

Correct Answer: C

QUESTION 2

Observe the following items carefully, which two types of digital certificate enrollment processes are available for the Cisco ASA security appliance? (Choose two.)

- A. HTTP
- B. manual
- C. FTP
- D. SCEP
- E. LDAP
- F. TFTP

Correct Answer: BD

QUESTION 3

The following exhibit shows a Cisco ASA security appliance configured to participate in a VPN cluster. According to the exhibit, to which value will you set the priority to increase the chances of this Cisco ASA security appliance becoming the cluster master?

Configuration > Remote Access VPN > Load Balancing

Participate in Load Balancing Cluster

VPN Cluster Configuration

All servers in the cluster must get an identical cluster configuration.

Cluster IP address: UDP port:

Enable IPsec encryption

IPsec shared secret: Verify secret:

VPN Server Configuration

Public interface: Priority:

Private interface: NAT assigned IP address:

As a VPN cluster master, this device can send a fully qualified domain name (FQDN) using reverse DNS lookup of a cluster device, instead of its outside IP address, when redirecting VPN client connections to that cluster device.

Send FQDN to client instead of an IP address when redirecting

Note

All of the outside and inside network interfaces on the load-balancing devices in a cluster must be on the

- A. 10
- B. 100
- C. 0
- D. 1

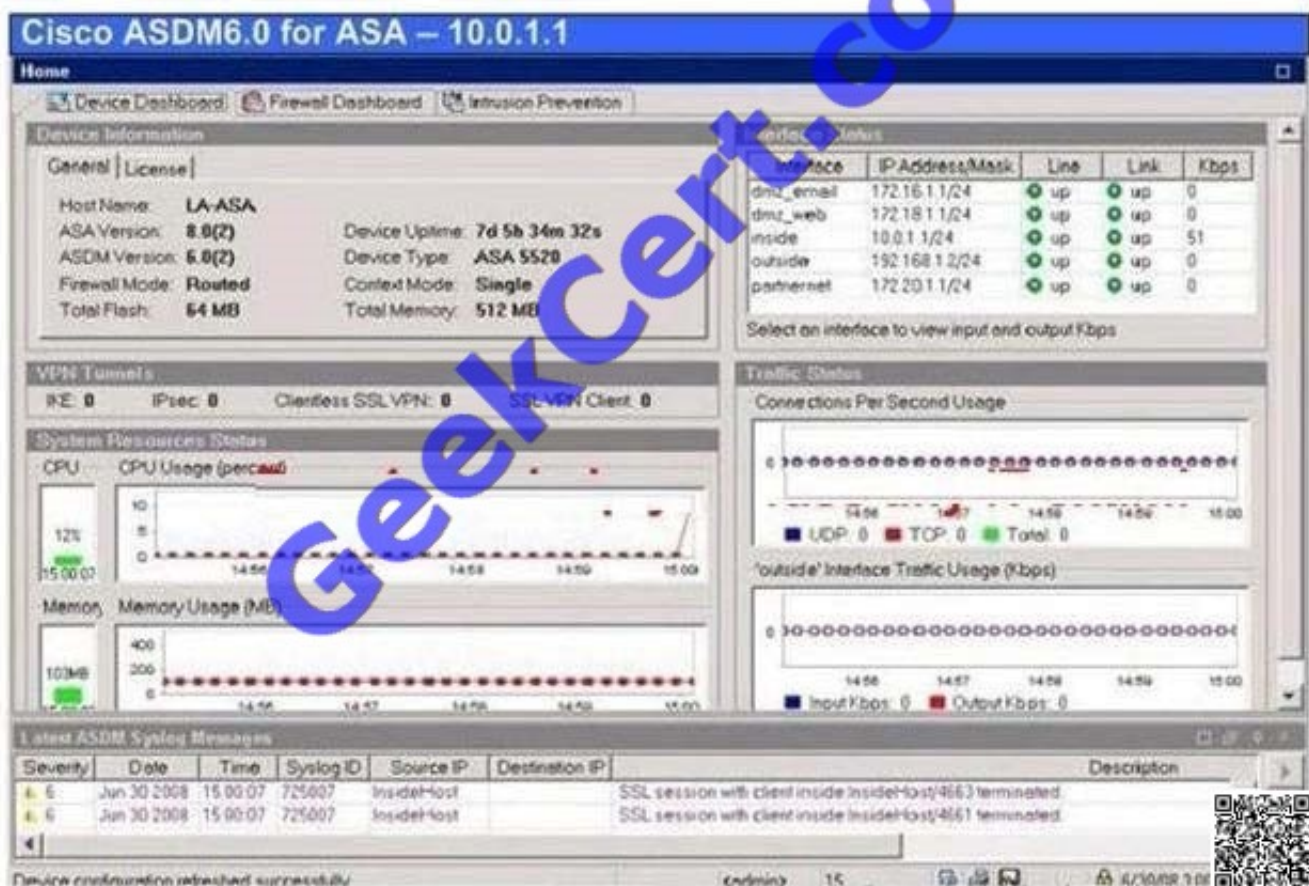

Correct Answer: A

QUESTION 4

Modular Policy Framework provides a consistent and flexible way to configure security appliance features in a manner similar to Cisco IOS software QoS CLI. Your company asked you to examine the current Cisco Modular Policy Framework configurations on the LA-ASA Cisco Adaptive Security Appliance (ASA) by use of the Cisco Adaptive Security Device Manager (ASDM).

Which two impacts are of the policy map named PARTNERNET-POLICY on FTP traffic entering the partnernet interface?

- A. Prevents all users except "root" from accessing the path /root.
- B. Logs all attempts to download files from the FTP server on the inside interface.
- C. Blocks the FTP request commands DELE, MKD, PUT, RMD, RNFR, and RNT0.
- D. Resets connections that send embedded commands.

Correct Answer: CD

QUESTION 5

Charles is a network administrator for his company. He has configured Cisco ASA security appliance for SSL VPNs. What will happen when the remote user has successfully authenticated according to the following exhibit?

- A. The Cisco ASA security appliance will open the clientless SSL VPN portal if no Cisco AnyConnect VPN Client is installed on the remote system.
- B. The Cisco ASA security appliance will push the Cisco AnyConnect VPN Client down to the remote system, install the client, and ask the user to authenticate again.
- C. The Cisco ASA security appliance will wait indefinitely for the user to select clientless SSL VPN portal or an SSL VPN client to use for the SSL VPN connection.
- D. The Cisco ASA security appliance will push the Cisco AnyConnect VPN Client down to the remote system, install the client, and use it to complete the SSL VPN connection.

Correct Answer: D
