QUESTION 1

You have a customer that operates a large open pit coal mine in the western United States. They need to deploy a wireless point-to-point bridge link across the mine. The distance of the link is 1.5 miles. Which three things do you need to consider prior to performing the site survey for this bridge link? (Choose three.)

A. What specific EPA training will be required prior to entering the customer site?

B. Is a specific Mine Safety and Health Administration training course and certificate required prior to entering the customer site?

C. What specific FCC training will be required prior to entering the customer site?

D. Will any specialized equipment or clothing will be required to perform the site survey?

E. Will customer escorts be needed during the site survey?

Correct Answer: BDE

QUESTION 2

An engineer is tasked with designing a WLAN. The customer is prioritizing data speeds to the desktop, but is also entertaining the idea of adding 802.11 phones in the future. Given this information, how should the engineer conduct the survey?

A. consider the employee head count in congested office space and limit the edge of each cell to an RSSI of -67mW

B. restrict AP cell edges to -67dB and be sure to strategically place APs in congested office spaces

C. co-locate access points when possible to cover high user areas and place APs at each corner of the facility

D. stagger the AP placements, and be sure to have a high signal to noise ratio that will accommodate the future VoIP devices

Correct Answer: B

QUESTION 3

Which two issues do access and backhaul radios experience in mesh networks? (Choose two.)

A. The access radio has to connect to two or several points.

B. The access cell usually covers more area at ground level that may have more sources of reflection and interference.

C. The access cell radio range is larger than the backhaul radio range, which causes the backhaul cell radio to suffer from more interference.

D. Backhaul radios are a bottleneck for throughput.

E. RAPs help MAPs avoid coverage holes.

Correct Answer: BD

QUESTION 4

What document must be kept current when a customer is conducting network maintenance?

A. installation report

B. survey report

C. readiness report

D. technical report

Correct Answer: A

QUESTION 5

Which two of the following are considered best practices upon the completion of a wireless installation? (Choose two.)

A. Consult with the customer to ensure that the IT staff has a complete set of design and installation documents.

B. Test all the customer\\'s wireless devices and applications to ensure they are working properly.

C. Make sure the customer is aware that they should consider purchasing a support contract immediately after the installation is complete.

D. Spend time with the customer showing them the controller GUI as well as inform them how they can reach the Cisco TAC if they have any problems.

Correct Answer: AB
