QUESTION 1

What three best practices should be performed for a Data-Only Survey? (Choose three.)

- A. reduce the power to 50% of the client max power
- B. reduce the power to 75% of the client max power
- C. disable DTPC
- D. enable DTPC
- E. 5 - 10 percent overlap
- F. 10 - 15 percent overlap

Correct Answer: ACF

QUESTION 2

You have a customer that operates a large open pit coal mine in the western United States. They need to deploy a wireless point-to-point bridge link across the mine. The distance of the link is 1.5 miles. Which three things do you need to consider prior to performing the site survey for this bridge link? (Choose three.)

- A. What specific EPA training will be required prior to entering the customer site?
- B. Is a specific Mine Safety and Health Administration training course and certificate required prior to entering the customer site?
- C. What specific FCC training will be required prior to entering the customer site?
- D. Will any specialized equipment or clothing will be required to perform the site survey?
- E. Will customer escorts be needed during the site survey?

Correct Answer: BDE

QUESTION 3

What is the vertical height that a MAP should not exceed for proper deployment?

- A. 15 ft
- B. 30 ft
- C. 45 ft
- D. 55 ft

Correct Answer: B

QUESTION 4

Refer to the exhibit.

The signal is being degraded to the point of link drops. You have examined the roof and the visual sighting of the remote antenna. What could be causing the issue?

- A. The receiving antenna is too close to the transmitting antenna.
- B. The first Fresnel zone is more than 60% blocked by the parapet.
- C. The visual line of sight is more than 60% blocked by the parapet.
- D. The cable between the APs and the antennae is introducing too much loss.
- E. The roof material is absorbing too much of the signal.

Correct Answer: B

QUESTION 5

Which three things do you need to consider prior to performing a wireless site survey? (Choose three.)

- A. The time required to acquire any additional infrastructure components.
- B. The time required to survey each potential AP location.
- C. The time required to assess application server locations at the customer facility.
- D. The type of wireless survey tools required to perform the site survey.

E. The time required to assess customer WLAN density and throughput requirements.

F. The time required to utilize the design mode in Cisco WCS to prepare a preliminary WLAN design to reduce on-site survey time.

Correct Answer: BDE
