QUESTION 1

Which two issues can commonly create problems with positioning an antenna on a rooftop? (Choose two.)

- A. Reflection from the rooftop
- B. Absorption from the rooftop
- C. Fresnel obstruction from rooftop edge
- D. Lack of PoE for AP
- E. Other antennas

Correct Answer: CE

QUESTION 2

A Cisco engineer is troubleshooting a Cisco 1250 series 802.11n access point with a maximum throughput on 2.4 GHz that is limited to 72 Mbps. Why might the AP be operating in a limited capacity?

- A. the switch providing PoE supports 802.3af
- B. the switch providing PoE supports 802.3at
- C. the 2.4 GHz bandwidth is 20 MHz wide
- D. the 2.4 GHz is 40 MHz wide

Correct Answer: A

QUESTION 3

A customer wants to deploy wireless services inside a 500-seat auditorium. Given the volume of potential users in this condensed area, what is the best option for AP deployment?

- A. place 802.11n APs along the outside edge with dual-band directional antennas
- B. place 802.11n APs along the outside edge with 2.4GHz directional antennas
- C. place 802.11n APs along the outside edge with 5GHz directional antennas
- D. place 802.11n APs in the center with 2.4GHz sector antennas
- E. place 802.11n APs in the center with 5GHz sector antennas
- F. place 802.11n APs in the center with dual-band sector antennas

Correct Answer: B

QUESTION 4

You have been contacted by a medium sized medical center to do a site survey of their existing WLAN. The current network is set up with multiple SSIDs/VLANs to separate voice and data and the networks functioning properly. The medical center would like to add Vocera voice badges to the existing VoWLAN. Which two issues need to be considered during the site survey? (Choose two.)

- A. The additional voice endpoints may increase additional load, which may increase delay in the WLAN and cause voice quality to degrade.
- B. There will not be any issues due to adding the Vocera voice badges because they are point-to-point devices and do not require the infrastructure to communicate.
- C. Verify the WLAN is multicast enabled for Vocera voice badges.
- D. To make these devices as efficient as possible, the Vocera voice badges should be placed on their own unicast SSID/VLAN.
- E. Verify the WLAN that is being used by the Vocera voice badges is configured in the WLC to use the Gold QoS value.

Correct Answer: AC

QUESTION 5

You have been asked to evaluate a new version 7.0 controller-based WLAN deployment. The customer wants to increase the number of indoor tags their network supports. How do you explain to the customer how wireless clients and RFID tags are licensed in the MSE?

- A. There is a 2:1 relationship between the number of clients and RFID tags that can be supported in the MSE.
- B. The number of clients and RFID tags are independent of each other and have separate license bases.
- C. There is a 3:1 relationship between the number of clients and RFID tags that can be supported in the MSE.
- D. The relationship between clients and RFID tags is balanced. So if you have more clients you have fewer RFID tags.
- E. RFID and wireless clients require separate dedicated MSE appliances.

Correct Answer: D
