100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Cisco  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

Which three call information items does AirMagnet VoFi Analyzer provide? (Choose three.)

- A. the codec used by the calling phone
- B. approximate length of the call in minutes
- C. MOS values throughout the duration of the call
- D. 802.11e access category overruns
- E. co-channel interference percentage during the call

Correct Answer: ABC

---

### QUESTION 2

An engineer is configuring a new VoWLAN and wants only IEEE 802.11g/n to be supported. Which two data rates should be configured? (Choose two.)

- A. 18 Mbps and higher should be supported.
- B. Lower than 24 Mbps should be supported.
- C. Lower than 11 Mbps should be disabled.
- D. 1, 2, 5.5, and 11 Mbps should be disabled.
- E. 11 Mbps should be mandatory.
- F. 6 and 9 Mbps should be supported.
- G. 12 Mbps should be mandatory.

Correct Answer: AG

---

### QUESTION 3

What happens to a wireless client when it moves from one controller to another in a different mobility domain?

- A. The client will have to reauthenticate, reassociate, and get new IP address information.
- B. The client will have to reauthenticate and reassociate, but will be able to keep its IP address information.
- C. Nothing happens as long as the client roams within the same mobility group.
- D. It is not possible to roam to a different mobility domain.

Correct Answer: A

---

#### QUESTION 4

When designing a large, high-availability wireless network, what changes to a mobility-group would create less load on the controllers while maintaining the same mobility messages?

- A. remove unnecessary controllers from the mobility-group to cut down on the controller's messaging load
- B. separate the controllers into different mobility-groups per controller to only send relevant messaging to controllers in different groups
- C. configure mobility-group multicast messaging
- D. configure the controllers into separate RF-Groups from the mobility-groups to cut down on controller processing load

Correct Answer: C

---

#### QUESTION 5

You have two packets with decimal ToS values of 32 and 34. What are their results, respectively, in an IP precedence-only device?

- A. Both packets have an IP precedence tag of CS4, and the packet with the decimal value of 34 has a higher drop probability.
- B. The packet with the decimal value of 32 has an IP precedence tag of CS4, while the other decimal value of 34 is ignored and treated as best effort.
- C. The packet with the decimal value of 34 has an IP precedence tag of CS4, while the other decimal value of 32 is ignored and treated as best effort.
- D. Both packets have a decimal value that results in an IP precedence tag of CS4.

Correct Answer: D
