**QUESTION 1**

DRAG DROP

You have a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) deployment.

You need to implement anti-virus protection for all Configuration Manager clients. The solution must ensure that servers have different anti-virus settings than client computers.

In which order should you perform the required actions? To answer drag the appropriate actions to the correct locations. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll

to view content.

Select and Place:

Correct Answer:

Step 1: EndPoint Protection

When System Center 2012 Endpoint Protection isused with Microsoft System Center 2012 Configuration Manager, it provides a comprehensive enterprise management solution that lets you do the following:

*

Centrally deploy and configure the EndpointProtection client.

*

Configure default and custom antimalware policies that apply to groups of computers.

Etc

Step 2:

Client settings for devices include Endpoint Protection.

All client settings in System Center 2012 Configuration Manager are managed in the Configuration Manager console from the Client Settingsnode in the Administration workspace. A set of default settings is supplied with Configuration

Manager. When you modify the default client settings, these settings are applied to all clients in thehierarchy. You can also configure custom client settings,which override the default client settings when you assign these to collections.

---

QUESTION 2

DRAG DROP

Your network contains a System Center 2012 R2 Configuration Manager Service Pack 1 (SPl) environment.

Your company has a finance department that contains 100 client computers. Only some of the client computers have the Microsoft Application Virtualization (App-V) client installed.

You have a new application named App1.

You need to deploy App1 to all of the users in the finance department.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

## Actions

| |
|---|
| Distribute the content to distribution poins. |
| Configure the App-V client as a requirement of App1. |
| Create App1 as a new application. |
| Create App1 as a new package in the software library. |
| Create a new deployment for App1 and set the deployment to **Required**. |
| Create the App-V client as a new application in the software library. |

## Answer Area

Correct Answer:

## Actions

| |
|---|
| Create App1 as a new application. |
| Create App1 as a new package in the software library. |
| Create the App-V client as a new application in the software library. |

## Answer Area

| |
|---|
| Configure the App-V client as a requirement of App1. |
| Create a new deployment for App1 and set the deployment to **Required**. |
| Distribute the content to distribution poins. |

**QUESTION 3**

DRAG DROP

Your network contains a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) environment.

Your company has a security policy that contains mandatory registry settings for all servers.

You have a collection named Servers that contains all of the servers.

You need to identify which servers do not comply with the security policy.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

| |
|---|
| Create a new configuration item. |
| Create a new configuration baseline. |
| Run the Microsoft Baseline Security Analyzer (MBSA). |
| Enable Software Inventory for the Servers collection. |
| Add the configuration item to the configuration baseline. |
| Deploy the configuration baseline to the Servers collection. |

Correct Answer:

Left:

Run the Microsoft Baseline Security Analyzer (MBSA).

Enable Software Inventory for the Servers collection.

Right:

Create a new configuration item.

Create a new configuration baseline.

Add the configuration item to the configuration baseline.

Deploy the configuration baseline to the Servers collection.

**QUESTION 4**

HOTSPOT

You have a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1).

You plan to create a device collection named Collection1.

You need to build the membership rule for Collection1. Members of Collection1 must have names that start with the word "Computer", followed by exactly one character.

How should you complete the WQL statement? To answer, select the appropriate options in the answer area.

Hot Area:

## Answer Area

```
Select
  SMS_R_SYSTEM.ResourceID,SMS_R_SYSTEM.ResourceType,SMS_R_SYSTEM.Name,
  SMS_R_SYSTEM.SMSUniqueIdentifier,SMS_R_SYSTEM.ResourceDomainORWorkgroup,
  SMS_R_SYSTEM.Client from SMS_R_System
Where
```

| SMS_G_System_DESKTOP.Name ▼ | = ▼ | "Computer%" ▼ |
| SMS_R_System.Name | is equal to | "Computer*" |
|  | is like | "Computer?" |
|  |  | "Computer_" |

Correct Answer:

## Answer Area

```
Select
  SMS_R_SYSTEM.ResourceID,SMS_R_SYSTEM.ResourceType,SMS_R_SYSTEM.Name,
  SMS_R_SYSTEM.SMSUniqueIdentifier,SMS_R_SYSTEM.ResourceDomainORWorkgroup,
  SMS_R_SYSTEM.Client from SMS_R_System
Where
```

| SMS_G_System_DESKTOP.Name ▼ | = ▼ | "Computer%" ▼ |
| **SMS_R_System.Name** | is equal to | "Computer*" |
|  | **is like** | "Computer?" |
|  |  | **"Computer_"** |

Box 1: SMS_R_System.Name

The SMS_R_System Windows Management Instrumentation (WMI) class is an SMS

Provider server class, in Configuration Manager, that is generated dynamically at SMS

Provider run time and contains discovery data for all discovered system resources.

Box 2: For relational operators that perform LIKE comparisons ("is like" or "is not like"), you can use wildcard characters within the string.

Box 3: Computer_

_ (underscore character)

Any one character.

**QUESTION 5**

DRAG DROP

You have a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) standalone primary site.

You use Configuration Manager to deploy software updates to client computers.

You plan to monitor the software update deployment process from a client computer.

You need to collect data as quickly as possible to monitor the software update deployment process.

Which actions should you initiate from the client computer? To answer, drag the appropriate actions to the correct locations. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or

scroll to view content.

Select and Place:

Correct Answer:
