QUESTION 1

DRAG DROP

Your network contains a System Center 2012 Configuration Manager environment. Three users named User1, User2, and User3 will perform the following tasks:

- User1 will review software metering data and inventory reports.
- User2 will deploy Applications and create alerts.
- User3 will create configuration items.

You need to identify which security role must be assigned to which user.

What should you identify?

To answer, drag the appropriate security role to the correct user in the answer area. Each security role may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.

Select and Place:

Security Role	Answer Area
Application Administrator	User1 <input type="text" value="Security role"/>
Application Deployment Manager	User2 <input type="text" value="Security role"/>
Asset Manager	User3 <input type="text" value="Security role"/>

Correct Answer:

Security Role	Answer Area
<input type="text"/>	User1 <input type="text" value="Asset Manager"/>
<input type="text"/>	User2 <input type="text" value="Application Deployment Manager"/>
<input type="text"/>	User3 <input type="text" value="Application Administrator"/>

*

Asset Manager - A security role that grants permissions to administrative users so that they can manage the Asset Intelligence synchronization point, Asset Intelligence reporting classes, software inventory, hardware inventory, and metering rules.

*

Application Deployment Manager - A security role that grants permissions to administrative users so that they can deploy and monitor applications.

*

Compliance SettingsManager - A security role that grants permissions to administrative users so that they can define and monitor compliance settings.

QUESTION 2

HOTSPOT

You have a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) deployment.

You have two domain users named User1 and User2.

The users will perform the following administrative tasks:

User1 will create device collections.

User2 will create task sequences.

You need to identify to which security role each user must be added. The solution must use the principle of least privilege.

Which security roles should you identify? To answer, select the appropriate options in the answer area.

Hot Area:

Answer Area

Option

User1:

▼

- Application Author
- Asset Manager
- Company Resource Access Manager
- Operations Administrator

User2:

▼

- Application Deployment Manager
- Company Resource Access Manager
- Operating System Deployment Manager
- Infrastructure Administrator

Correct Answer:

Answer Area

Option

User1:

- Application Author
- Asset Manager
- Company Resource Access Manager
- Operations Administrator

User2:

- Application Deployment Manager
- Company Resource Access Manager
- Operating System Deployment Manager
- Infrastructure Administrator

Box 1: Asset Manager.

Grants permissions to manage the Asset Intelligence Synchronization Point, Asset Intelligence reporting classes, software inventory, hardware inventory, and metering rules.

This role also has the permission to create device collections. Operations Manager can also create task sequences but Asset Manager has least privilege.

Box 2: Operating System Deployment Manager

Grants permissions to create operating system images and deploy them to computers.

Administrative users who are associated with this role can manage operating system installation packages and images, task sequences, drivers, boot images, and state migration settings.

QUESTION 3

HOTSPOT

You have a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) standalone primary site.

You have a Configuration Manager application named App1 and a Configuration Manager package named Package1.

You need to ensure that App1 and Package1 are deployed only to Windows 8 computers.

In the table below, identify what to configure for App1 and Package1.

NOTE: Make only one selection in each column.

Hot Area:

Answer Area

Configuration	App1	Package1
Deployment type requirements	<input type="radio"/>	<input type="radio"/>
Distribution settings	<input type="radio"/>	<input type="radio"/>
Program advanced settings	<input type="radio"/>	<input type="radio"/>
Program requirements	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Configuration	App1	Package1
Deployment type requirements	<input type="radio"/>	<input type="radio"/>
Distribution settings	<input type="radio"/>	<input type="radio"/>
Program advanced settings	<input type="radio"/>	<input type="radio"/>
Program requirements	<input checked="" type="radio"/>	<input checked="" type="radio"/>

QUESTION 4

DRAG DROP

Your network contains a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) environment. Three users named User1, User2, and User3 will perform the following tasks:

- User1 will review software metering data and inventory reports.
- User2 will deploy applications and create alerts.
- User3 will create configuration items.

You need to identify which security role must be assigned to which user.

What should you identify?

To answer, drag the appropriate security role to the correct user in the answer area. Each security role may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.

Select and Place:

Security Role

- Application Deployment Manager
- Asset Manager
- Compliance Settings Manager

Answer Area

- User1** Security role
- User2** Security role
- User3** Security role

Correct Answer:

Security Role

-
-
-

Answer Area

- User1** Asset Manager
- User2** Application Deployment Manager
- User3** Compliance Settings Manager

*

Box 1: Asset Manager

Grants permissions to manage the Asset Intelligence Synchronization Point, Asset Intelligence reporting classes, software inventory, hardware inventory, and metering rules.

*

Box 2: Application Deployment Manager

Grants permissions to deploy applications. Administrative users who are associated with this role can view a list of applications, and they can manage deployments for applications, alerts, templates and packages, and programs.

Administrative users who are associated

with this role can also view collections and their members, status messages, queries, and conditional delivery rules.

*

Box 3: Compliance Settings Manager

Grants permissions to define and monitor Compliance Settings. Administrative users associated with this role can create, modify, and delete configuration items and baselines.

They can also deploy configuration baselines to collections, and initiate compliance evaluation, and initiate remediation for non-compliant computers.

QUESTION 5

DRAG DROP

You manage a system Centre 2012 R2 Configuration Manager Service Pack1 (SP1) standalone primary site that contains a software update point. You need to implement a configuration baseline that will contain a software updates configuration item.

Which three actions should you perform in sequence?

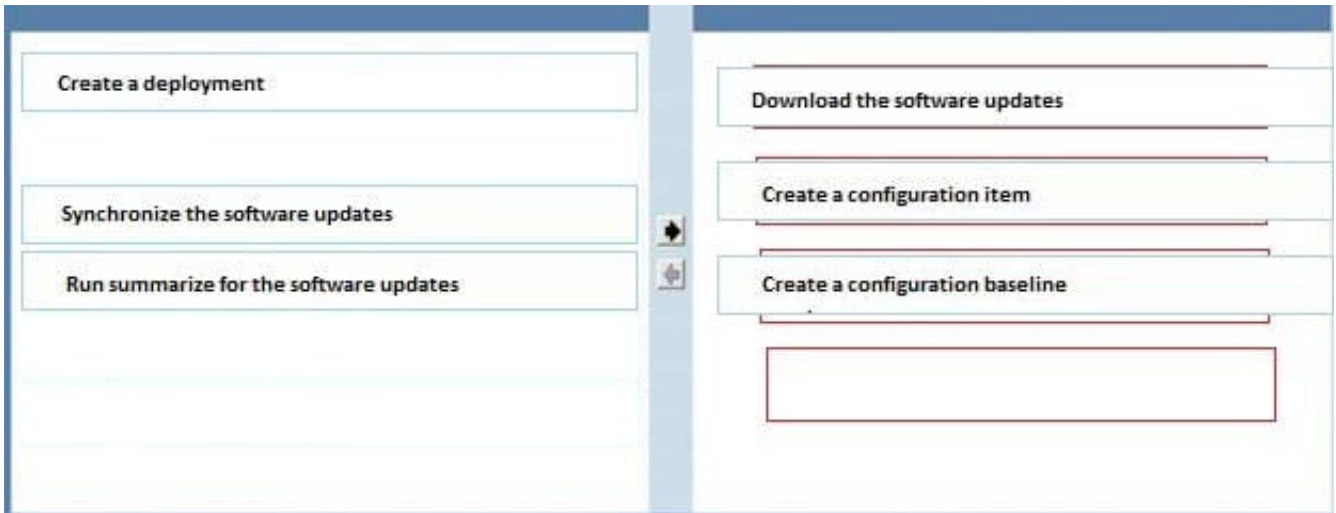

Select and Place:

The screenshot shows the Configuration Manager console interface. On the left side, there is a list of actions that can be performed in sequence:

- Create a deployment
- Download the software updates
- Synchronize the software updates
- Run summarize for the software updates
- Create a configuration baseline
- Create a configuration item

On the right side, there are four empty rectangular boxes, each with a red border, intended for the user to drag and drop the selected actions into them in the correct sequence.

Correct Answer:
