QUESTION 1

Your company has a datacenter in Los Angeles.

The datacenter contains a System Center 2012 Virtual Machine Manager (VMM) infrastructure. The VMM infrastructure contains a server named VMM1.

You have a host group named HostGroup1. HostGroup1 contains four virtualization hosts named Host1, Host2, Host3, and Host4.

You plan to provide users with the ability to deploy virtual machines by using the Self-Service Portal.

The company's security policy states that only the members of a group named VMMAdmin1 can place virtual machines on Host1 and Host2 and only the members of a group named VMMAdmin2 can place virtual machines on Host3 and

Host4.

You need to recommend a cloud configuration to meet the requirements of the security policy. What should you recommend?

- A. Create two host groups named HostGroup1\Group1 and HostGroup1\Group2. Create one cloud for each new host group. Move two servers to each host group
- B. Create a host group named HostGroup1\HostGroup2. Create one cloud for HostGroup1 and one cloud for HostGroup2. Move two servers to HostGroup2.
- C. Create two clouds named Private1 and Private2. Configure the custom properties of each cloud.
- D. Create two clouds named Private1 and Private2. Configure placement rules for HostGroup1.

Correct Answer: A

QUESTION 2

You need to recommend a solution to control the provisioning of the virtual machines by the research department users. The solution must meet the requirements for managing services in the private cloud. What should you include in the recommendation? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. VMM placement rules and Service Manager service offerings
- B. VMM custom properties and Orchestrator runbooks
- C. VMM placement rules and capability profiles
- D. A separate VMM cloud for the research department users

Correct Answer: C

The Research department contains clustered Hyper-V hosts and standalone Hyper-V hosts. When research users deploy an instance of App1, the VMs in App1 must be highly available. Therefore, they must be deployed to the clustered Hyper-V hosts. A capability profile can specify that a VM must be highly available and a placement rule can ensure it is deployed to clustered Hyper-V hosts. A private cloud including the standalone Hyper-V hosts would not

ensure this.

QUESTION 3

You need to recommend a solution to meet the technical requirements for the web tier of Appl.

What should you include in the recommendation? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. Network Load Balancing (NLB)
- B. Failover Clustering
- C. Multipath I/O (MPIO)
- D. DNS round robin

Correct Answer: A

Network Load Balancing (NLB) provides scalability and at the same time helps increase availability of Web-based services <http://technet.microsoft.com/en-us/library/cc725946.aspx>

QUESTION 4

You need to recommend a design for the Operations Manager 2012 infrastructure. What should you include in the recommendation? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. In the Dublin data center, one local management group that contains two management servers In each of the data centers in Dublin, Bangalore, Dallas, and Sydney, one remote management group that contains two management servers
- B. One management group that contains all of the management servers One resource pool that contains all of the management servers
- C. In the Dublin data center, one connected management group that contains two management servers In each of the data centers in Bangalore, Dallas, and Sydney, one local management group that contains two management servers
- D. In the Dublin data center, one local management group that contains two management servers In each of the data centers in Bangalore, Dallas, and Sydney, one connected management group that contains two management servers

Correct Answer: D

QUESTION 5

You need to recommend the configuration settings for the SQL Server instance that will host the App Controller database. The solution must support the planned changes. What should you include in the recommendation?

- A. Change the database collation.

- B. Enable case sensitivity.
- C. Disable full-text search.
- D. Install the SQL Server Reporting Services (SSRS).

Correct Answer: A

To support Simplified Chinese change MS SQL Collation [http://msdn.microsoft.com/en-us/library/ms144250\(v=sql.105\).aspx](http://msdn.microsoft.com/en-us/library/ms144250(v=sql.105).aspx)
