QUESTION 1

Your network contains an Active Directory forest named contoso.com. The forest contains a server farm that has Microsoft SharePoint Server 2010 installed.

You deploy System Center 2012 R2 Operations Manager. You deploy the Microsoft Monitoring Agent to all of the servers on the network.

You need to ensure that you can publish Operations Manager dashboards to a SharePoint site.

You copy the required files to SharePoint Server.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Configure the Operations Manager web console environment.	
Import the System Center SharePoint Management Pack for SharePoint Server in Operations Manager.	
Install the Microsoft.EnterpriseManagement.SharePointIntegration.wsp solution package.	
Activate the Operations Manager dashboard Web Part.	
Install the Operations Manager console on the front-end SharePoint servers.	

Correct Answer:

Actions	Answer Area
<p>Import the System Center SharePoint Management Pack for SharePoint Server in Operations Manager.</p>	<p>Install the Microsoft.EnterpriseManagement.SharePointIntegration.wsp solution package.</p>
	<p>Activate the Operations Manager dashboard Web Part.</p>
	<p>Configure the Operations Manager web console environment.</p>
<p>Install the Operations Manager console on the front-end SharePoint servers.</p>	

QUESTION 2

You need to recommend a solution for the management packs. The solution must meet the cloud requirements. What should you recommend? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. Export the management packs, and then modify the settings of the management packs. Seal the management packs, and then import the management packs.
- B. Export the management packs, modify the settings of the management packs, and then import the unsealed management packs.
- C. Unseal the management packs, and then modify the settings of the management packs.
- D. Create a new management pack that contains overrides.

Correct Answer: B

QUESTION 3

Your network contains servers that have System Center 2012 Virtual Machine Manager (VMM) installed and servers that have System Center 2012 App Controller installed.

You create a private cloud named Cloud1.

You add a VMM connection in App Controller.

You verify that you can connect to Cloud1 from the App Controller portal.

A user named User1 fails to connect to Cloud1 from the App Controller portal as shown in the exhibit. (Click the Exhibit button.)

You need to ensure that User1 can connect to Cloud1 from the App Controller portal. What should you do?

- A. From the App Controller portal, modify the properties of the VMM connection.
- B. From the App Controller portal, create a User Role.
- C. From the VMM Administrator Console, modify the properties of Cloud1.
- D. From the VMM Administrator Console, create a User Role.

Correct Answer: D

You can create user roles in System Center 2012 Virtual Machine Manager (VMM) to define the objects that users can manage and the management operations that users can perform.

Reference: Creating User Roles in VMM URL: <http://technet.microsoft.com/en-us/library/gg696971.aspx>

QUESTION 4

Your network contains an Active Directory forest named contoso.com.

The network of a prospective client contains an Active Directory forest named fabrikam.com. You need to design the placement of System Center 2012 R2 components to meet the following requirements:

Ensure that administrators from the contoso.com forest can monitor the computers in both forests.

Minimize the number of firewall ports open between the organizations.

Answer Area

Contoso.com forest:

Fabrikam.com forest:

Authentication method:

What should you deploy in each forest and which authentication method should you use? To answer, select the appropriate options in the answer area.

Hot Area:

Answer Area

Contoso.com forest:
Operations Manager gateway server
Operations Manager management server
Web application proxy

Fabrikam.com forest:
Operations Manager gateway server
Operations Manager management server
Web application proxy

Authentication method:
Certificate authentication
Kerberos authentication

Correct Answer:

Answer Area

Contoso.com forest:
Operations Manager gateway server
Operations Manager management server
Web application proxy

Fabrikam.com forest:
Operations Manager gateway server
Operations Manager management server
Web application proxy

Authentication method:
Certificate authentication
Kerberos authentication

QUESTION 5

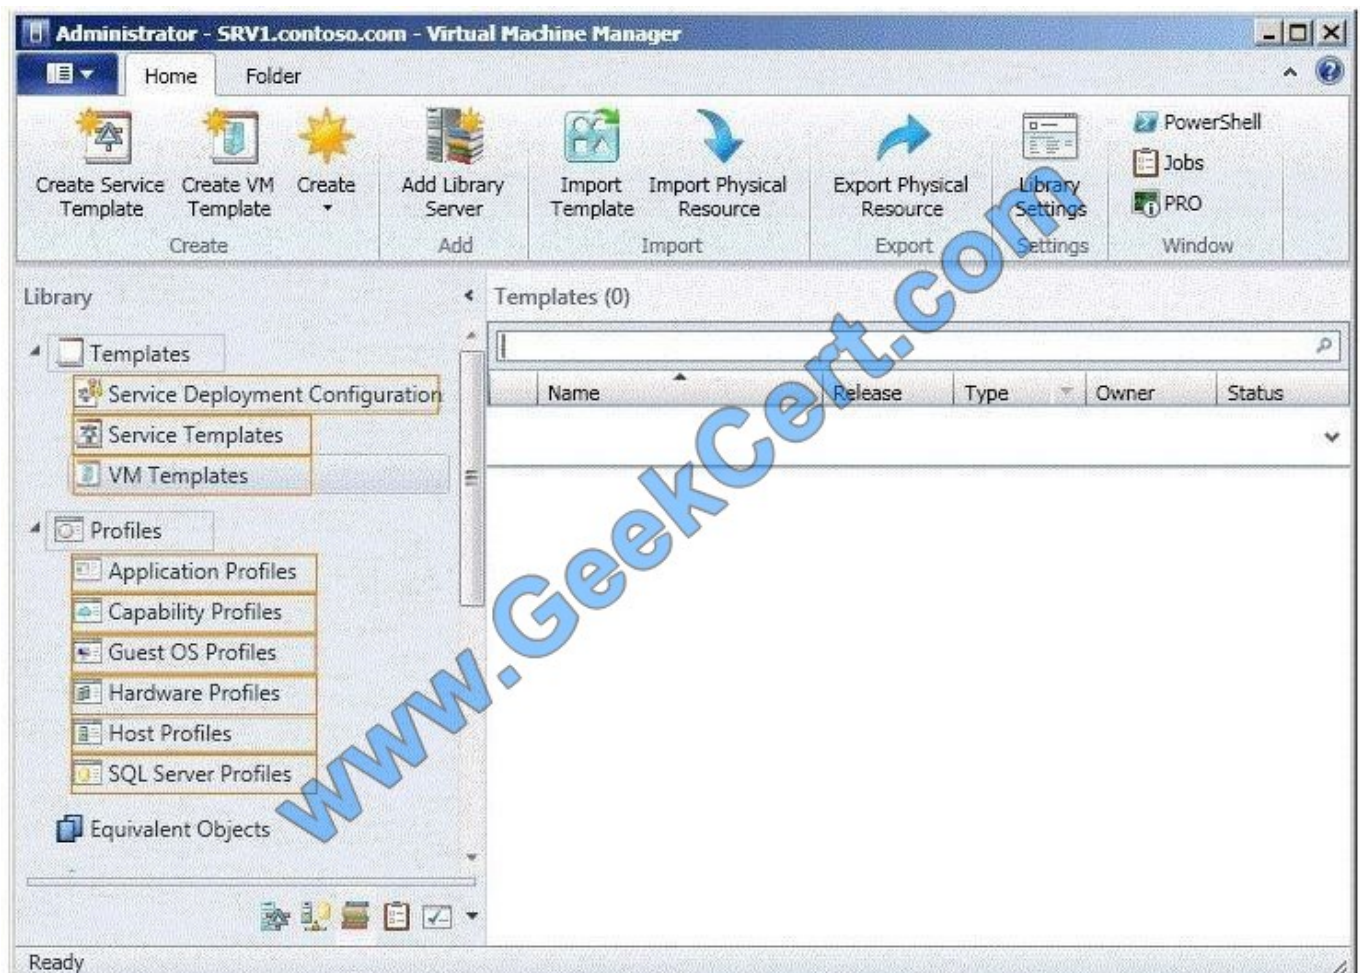

You have a System Center 2012 Virtual Machine Manager (VMM) infrastructure.

You create a SQL Server Profile.

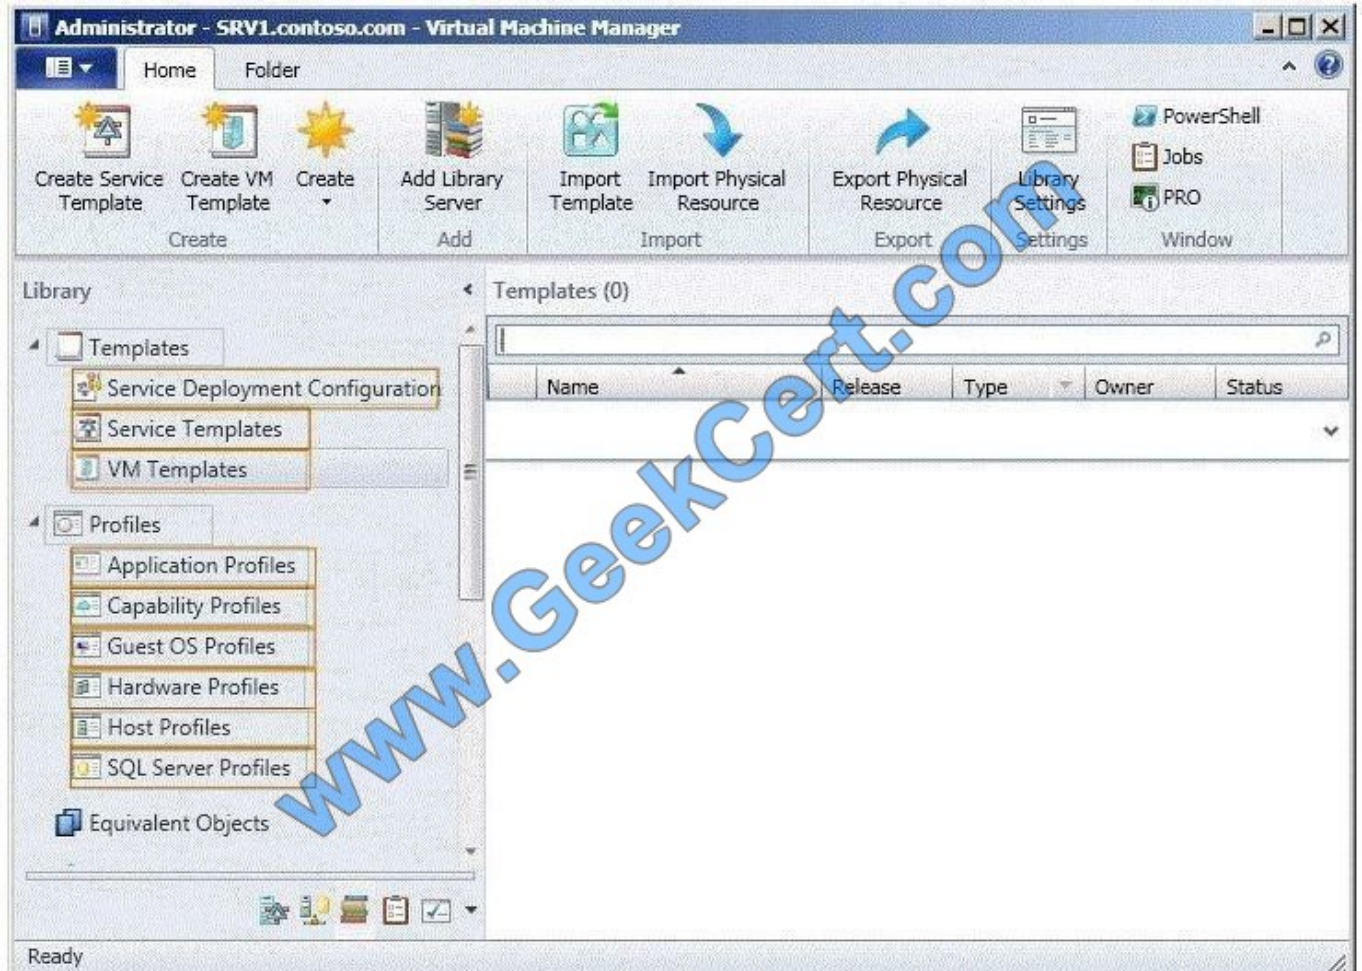

You plan to deploy new virtual machines based on a virtual machine template named VT1. You need to ensure that the SQL Server Profile is applied to the new virtual machines. Which object should you create from the VMM Administrator

Console? To answer, select the appropriate object type in the answer area.

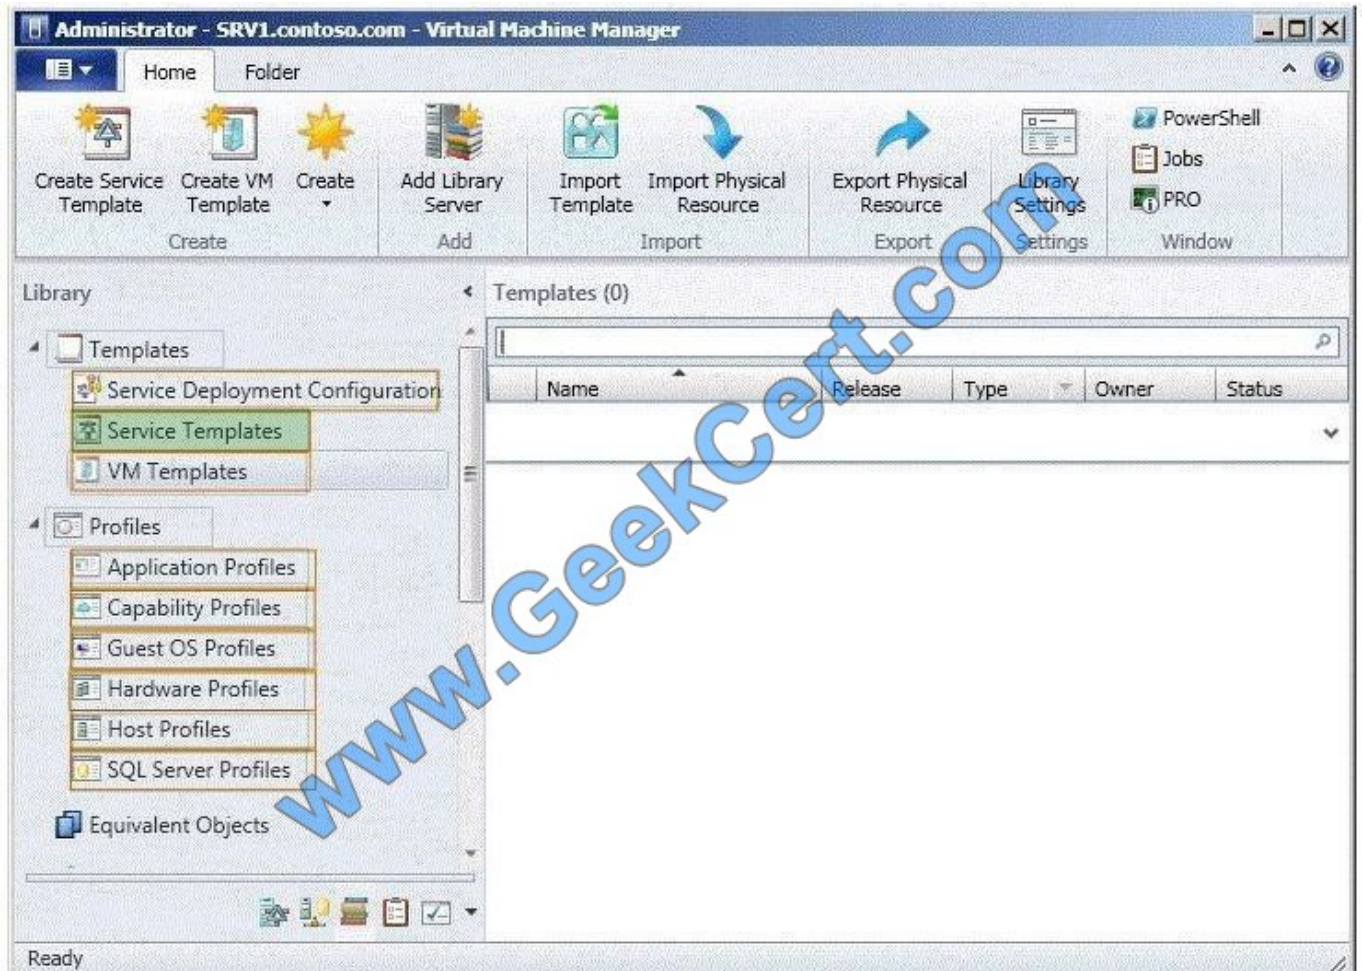

Hot Area:

Hot Area:

Correct Answer:

SQL Server Profile is supported for services, but not for standalone VM creation. Therefore, there are three main steps to use SQL Server profile to deploy VMs and configure SQL Server:

1.
Create SQL Server profile.
2.
Create Service Template.
- 3.

Deploy Service. <http://blogs.technet.com/b/scvmm/archive/2011/09/27/vmm-2012-sql-server-profile.aspx?Redirected=true>
